Re: Groundwater Analytical Results

17349 Via Magdalena San Lorenzo, California

Dear Mr. Kast:

This letter presents sampling results of the irrigation water-supply well located on the property referenced above. ARCO Products Company (ARCO) and Pacific Environmental Group, Inc. (PACIFIC) would like to express their gratitude for your cooperation in this project.

On behalf of ARCO, PACIFIC performed groundwater sampling to test for gasoline in the water. The groundwater sample was collected on September 21, 1994, and was submitted to the laboratory for analysis for total petroleum hydrocarbons calculated as gasoline (TPH-g), benzene, toluene, ethylbenzene, and xylenes (BTEX compounds).

Laboratory analysis of the groundwater samples collected from your well on September 21, 1994 detected TPH-g and benzene at concentrations of 590 and 1.8 parts per billion (ppb), respectively. These compounds are indicative of gasoline. Groundwater analytical data are presented in Table 1.

Please call me at (408) 441-7500, or Ms. Juliett Shin of Alameda County Health Care Services at (510) 271-4320 if you have any questions regarding the contents of this letter.

Sincerely,

Pacific Environmental Group, Inc.

Dear Mr. and Mrs. Corregedor:

This letter presents sampling results of the irrigation water-supply well located at the property referenced above. ARCO Products Company (ARCO) and Pacific Environmental Group, Inc. (PACIFIC) would like to express their gratitude for your cooperation in this project.

On behalf of ARCO, PACIFIC attempted to perform groundwater sampling to test for gasoline in the water on December 30, 1993. Since the well pump was inoperable, no groundwater sample was collected this quarter. Groundwater analytical data are presented in Table 1.
