Hello Paresh,

This email is in response to your letter dated 10/27/2011 concerning ARCO Station #608 (17601 Hesperian Blvd in San Lorenzo) in which you request that BP submit a Monitoring Well Destruction Report by 1/25/2012. For reasons discussed below, this email seeks an extension of this due date to complete the work and submit the subsequent report.

Due to the large number of wells associated with this Site that have not been sampled in many years, Broadbent has spent extra time determining what wells are in fact still in existence that require decommissioning. This effort has included contacting the Alameda County Public Works Agency Water Resources Section and obtaining Confidential Water Well Records from the DWR. The delay effected by this diligence has not resulted in any increased risk to human health or the environment. We therefore seek your approval to extend the deadline for the requested report to March 25, 2012.

The favor of a reply approving the extension request would be appreciated in order to avoid the appearance of violating an agency directive. I look forward to your reply.

With regards,

**Thomas A. Venus, PE**
