Hi James,

I have been looking at this site; however, it seems like everything takes longer than I would expect here. Unfortunately for this site, I think it would benefit from an additional groundwater sampling event this time. Groundwater concentrations have been fluctuating just enough to be less than clear cut. So please proceed with the monitoring this time.

(Gee - Seems like you're always headed off on vacation ☺; enjoy the break!).

Hi Mark,

Sorry to bombard you with e-mails today, but going on vacation at the end of the week so wanted to tie a few things up.

Regarding this site, as requested in your 9/27/10 letter we had submitted a letter report on the preferential pathway to Shepherd Creek issue on 12/10/10. I was curious if there was any update regarding review of this document. Reason I ask is the next GWM event at the site is scheduled for 3/7. The site has already been reduced to an annual frequency but since the pathway evaluation appeared to be the last item prior to consideration of closure perhaps a GWM suspension is in order? If you could please let me know the review status and, if not yet, if a temporary suspension would be acceptable to ACEH I would appreciate it. Thanks.

Sincerely,

---
