Dear Mr. Hill,

As a fellow government official, I know you share my deep concern for the Brown Act. As such, I will agree to disagree with you regarding your refusal to allow me to address the Board as an agenda item. I do find it peculiar that you would take that stance as the purpose of open government is always best served by transparency.

That said, my past conversations with Mr. Headlee have neither been productive nor pleasant. As I wrote in my email, he has refused to engage in a substantive discussion of this site, has not meaningfully responded to Barbara's continued refusal to respond to voicemails. While I certainly understand the time constraints your office is under, ignoring repeated contacts from an interested party seems rather unprofessional.

I do believe you and I need to meet at the site and discuss these matters in context. Please send me some proposed dates and times that work for you.

My clients and I take this matter very seriously. Mr. Headlee's recent comments that your office is not concerned with what happened before RWCB took over jurisdiction was very troubling. Understand that as an attorney, I do document everything that has been said-- please be more considerate that you are spending the people's money.

Regards,
Abe Gupta

Mr. Gupta – I am responding to your email on behalf of Water Board management. At issue is our office's oversight of a leaking underground fuel tank (LUFT) case - ABE Petroleum located at 17715 Mission Blvd, Hayward.

You suggest that additional state funds should not be spent on this LUFT case and, by inference, you think this LUFT case should be closed. With respect, we disagree. My staff reviewed all pertinent case data before we finalized our “denial of case closure” letter. That letter constitutes a final action by the Water Board. More precisely, the Board has delegated its authority to take certain actions (including case closure) to the Executive Officer and the Executive Officer issued the March 28 “denial of case closure” letter.

Since the Board has already acted, it would be inappropriate for us to schedule a future Board item on this topic. If you think the Board’s action was inappropriate, you have two options:

(i) You can address the Board at its public forum to request a reconsideration - The public forum is a regular item at all Board meetings and is scheduled at the beginning of the meeting. Public forum speakers are usually limited to 3 minutes. Board meetings are normally held on the second Wednesday of the month and normally start at 9:00 am.

(ii) You can submit a petition to the State Water Board – Petitions must be filed within 30 days of the action being petitioned; see California Water Code sections 13320 and 13321 for process details.

We remain willing to discuss this case with you. I have asked Chuck Headlee to contact you to set up a meeting, at which we can discuss case status, how the case compares to the State Water Board’s low-threat closure criteria, and a path forward.

Sincerely, Stephen Hill

Stephen Hill

This message has not received a response. Am I on the agenda?

Dear Mr. Headlee,

This message confirms as follows:

I have repeatedly availed myself of an opportunity to discuss with you what I believe to be a gross failure to regulate public monies. Further you believe inaction by your staff is acceptable.

To this end and in accordance with the Brown Act, I wish to be placed on the agenda for discussion on the April 10, 2013 San Francisco Bay Area Regional Water Control Board public meeting. I politely reject your invitation to address the Board during public comment and wish to be placed as an agenda item. I regret having to engage this matter in this manner as I believe it is unfortunate that your office has shown such an apathy for this matter, but I value the public's money too greatly to ignore this matter.

Regards,

Abe Gupta
