The following is a report detailing the results of the December 2009 semi-annual groundwater sampling at the Albany Hill Mini Mart Property. This sampling was conducted as required by the ACHCSA and RWQCB. ASE prepared this report on behalf of Dr. Joginder Sikand, the property owner and responsible party.

2.0 GROUNDWATER FLOW DIRECTION AND GRADIENT

On December 3, 2009, ASE measured the depth to groundwater in all ten site monitoring wells using an electric water level sounder. The surface of the groundwater was also checked for the presence of free-floating hydrocarbons or sheen. No sheen or free-floating hydrocarbons were observed in any of the monitoring wells. Groundwater elevation data is presented in Table One. A groundwater potentiometric surface map is presented as Figure 2. The general groundwater flow direction is to the east, west and north. The groundwater flow direction at the site varies significantly from quarter to quarter, and is likely being effected by the ozone-sparging taking place at the site.

3.0 GROUNDWATER SAMPLE COLLECTION AND ANALYSIS

On December 3, 2009, ASE collected groundwater samples from all ten monitoring wells. Prior to sampling, each monitoring well was purged of at least three well casing volumes of groundwater using disposable polyethylene bailers. The parameters pH, temperature and electrical conductivity were monitored during the well purging, and samples were not collected until these parameters stabilized. Monitoring well MW-9 went dry prior to completion of the purging of three well casing volumes and was allowed to recover for two hours prior to sampling. Groundwater samples were collected from each well using the same polyethylene bailers and were decanted from the bottom of the bailers using low-flow emptying devices into 40-ml volatile organic analysis (VOA) vials, pre-preserved with hydrochloric acid. The samples were capped without headspace, labeled, and placed in coolers with wet ice for transport to Kiff Analytical of Davis, California (ELAP #2236) under appropriate chain-of-custody documentation. Well sampling field logs are presented in Appendix A.

The well purge water was placed into a 55-gallon steel drum and labeled for temporary storage until proper disposal could be arranged.

The groundwater samples were analyzed by Kiff Analytical for total petroleum hydrocarbons as gasoline (TPH-G), benzene, toluene, ethylbenzene, and total xylenes (collectively known as BTEX), and fuel oxygenates including methyl tertiary-butyl ether (MTBE) by EPA Method 8260B, and total petroleum hydrocarbons as diesel (TPH-D) by EPA Method 8015M. The analytical results for this and previous sampling events are summarized in Table Two. The most recent certified analytical report and chain-of-custody documentation are included as Appendix B.

4.0 RESULTS AND CONCLUSIONS

- The TPH-G concentration in groundwater samples collected from monitoring well MW-1 increased slightly from last June's results; however, the BTEX and MTBE concentrations are at or near historic low concentrations.
- No TPH-G, TPH-D, BTEX or oxygenates were detected in groundwater samples collected from monitoring well MW-2. This is the fourth consecutive sampling event that no hydrocarbons or oxygenates were detected in this well.

Aqua Science Engineers, Inc. 55 Oak Court, Suite 220, Danville, CA 94526
(925) 820-9391 - Fax (925) 837-4853 - www.aquascienceengineers.com

- No TPH-G, TPH-D, BTEX or oxygenates were detected in groundwater samples collected from monitoring well MW-3 during this sampling event. This was the first time since the initial well sampling in August 1999 that all compounds were non-detectable, and the second consecutive sampling that all compound concentrations were below ESLs.
- Hydrocarbon concentrations detected in groundwater samples collected from monitoring well MW-4 were very similar to the June 2009 results, with slight increases in TPH-G, benzene and toluene concentrations and a slight decrease in the ethylbenzene concentration.
- There was a significant decrease in TPH-G and BTEX concentrations in groundwater samples collected from monitoring well MW-5R since the June 2009 sampling event. The current concentrations are more similar to those detected since early 2008. The MTBE concentration this quarter increased very slightly from the previous sampling event.
- There was a slight increase in TPH-G concentrations in groundwater samples collected from monitoring well MW-6 from the previous sampling event and a slight decrease in TBA and MTBE concentrations during this same period. All hydrocarbon and oxygenate concentrations other than TPH-G are now below ESLs.
- No hydrocarbons or oxygenate concentrations were detected in groundwater samples collected from monitoring wells MW-7 and MW-8 this quarter.
- Hydrocarbon concentrations detected in groundwater samples collected from monitoring well MW-9 increased slightly from the June 2009 results.
- Hydrocarbon concentrations in groundwater samples collected from monitoring well MW-10 increased significantly from the June 2009 results, and are now more similar to typical results since August 2007.

Concentrations exceeding Environmental Screening Levels¹ (ESLs):

¹ As presented in the "Screening For Environmental Concerns at Sites With Contaminated Soil and Groundwater" document prepared by the California Regional Water Quality Control Board, San Francisco Bay Region dated May 2008.

Aqua Science Engineers, Inc. 55 Oak Court, Suite 220, Danville, CA 94526
(925) 820-9391 - Fax (925) 837-4853 - www.aquascienceengineers.com

- In MW-1, benzene and MTBE concentrations exceeded ESLs.
- In MW-2, no concentrations exceeded ESLs.
- In MW-3, no concentrations exceeded ESLs.
- In MW-4, TPH-G, benzene and MTBE concentrations exceeded ESLs.
- In MW-5R, the MTBE concentration exceeded the ESL.
- In MW-6, the TPH-G concentration exceeded the ESL.
- In MW-7, no concentrations exceeded ESLs.
- In MW-8, no concentrations exceeded ESLs.
- In MW-9, TPH-G and BTEX concentrations exceeded ESLs.
- In MW-10, TPH-G, benzene, and ethylbenzene concentrations exceeded ESLs.

5.0 RECOMMENDATIONS

ASE recommends continued groundwater monitoring on a semi-annual basis. The next groundwater sampling is scheduled for June 2009. ASE also recommends the continued operation of the ozone-sparging groundwater remediation system through the year 2010.

6.0 REPORT LIMITATIONS

The results presented in this report represent the conditions at the time of the groundwater sampling, at the specific locations where the groundwater samples were collected, and for the specific parameters analyzed by the laboratory. It does not fully characterize the site for contamination resulting from sources other than the former underground storage tanks and associated plumbing at the site, or for parameters not analyzed by the laboratory. All of the laboratory work cited in this report was prepared under the direction of an independent CAL-DHS certified laboratory. The independent laboratory is solely responsible for the contents and conclusions of the chemical analysis data.

Notes:

Data prior to September 10, 2004, including survey data, is based on tables compiled by AARS.

*Top of casing elevations were initially surveyed to an arbitrary benchmark. The elevations were resurveyed on November 11, 2002 with respect mean sea level.

TABLE TWO
 Summary of Analytical Results for GROUNDWATER Samples
 Albany Hill Mini Mart
 800 San Pablo Avenue, Albany, CA
 All results are in parts per billion (ppb)

ESL	100	100	10	40	30	20	NE	12	5.0	Varies	

Notes:

Data prior to August 2004 is based on a table compiled by AARS - ASE has not checked results against original laboratory reports.

* Does not match diesel pattern

** Confirmed by GC/MS method 8260

ESL = Environmental screening levels presented in the "Screening For Environmental Concerns at Sites With Contaminated Soil and Groundwater (November 2007)" document prepared by the California Regional Water Quality Control Board, San Francisco Bay Region for sites where groundwater is a current or potential source of drinking water.

Most recent concentrations are in Bold.

Non-detectable concentrations noted by the less than sign (<) followed by the laboratory detection limit.

NE indicates that no ESL has been established for this compound.

APPENDIX B

Certified Analytical Report
and
Chain of Custody Documentation

Report Number : 71095

Date : 12/15/2009

David Allen
Aqua Science Engineers, Inc.
55 Oak Court, Suite 220
Danville, CA 94526

Subject : 10 Water Samples
Project Name : ALBANY HILL (A.H.)
Project Number : 3934

Dear Mr. Allen,

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink, appearing to read "Joel Kiff".

Joel Kiff

Project Number : 3934

Case Narrative

Matrix Spike/Matrix Spike Duplicate results associated with QC batch V-120709-W-11 for sample MW-9 for the analyte Methyl-t-butyl ether were outside of control limits, indicating a possible bias for this analyte. The only reported analyte for sample MW-9 that is associated with the Methyl-t-butyl ether spike is 'TPH as Gasoline'. The reported value for Methyl-t-butyl ether for sample MW-9 is from a different QC batch.

A version of this report was previously issued on 12/09/09. This revised version replaces that report.

COC Inspection

Is COC present?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Custody seals on shipping container?	<input type="checkbox"/> Intact	<input type="checkbox"/> Broken <input type="checkbox"/> Not present <input checked="" type="checkbox"/> N/A
Is COC Signed by Relinquisher? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Is sampler name legibly indicated on COC?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Is analysis or hold requested for all samples	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Is the turnaround time indicated on COC?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Is COC free of whiteout and uninitialed cross-outs?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No, Whiteout <input type="checkbox"/> No, Cross-outs

Sample Inspection

Coolant Present:	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No (includes water)
Temperature °C	<u>22</u>	Therm. ID# <u>12-5</u> Initial <u>2A</u> Date/Time <u>120409 / 2147</u> <input type="checkbox"/> N/A
Are there custody seals on sample containers?	<input type="checkbox"/> Intact	<input type="checkbox"/> Broken <input checked="" type="checkbox"/> Not present
Do containers match COC?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> No, COC lists absent sample(s)	<input type="checkbox"/> No, Extra sample(s) present
Are there samples matrices other than soil, water, air or carbon?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Are any sample containers broken, leaking or damaged?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Are preservatives indicated?	<input checked="" type="checkbox"/> Yes, on sample containers	<input type="checkbox"/> Yes, on COC <input type="checkbox"/> Not indicated <input type="checkbox"/> N/A
Are preservatives correct for analyses requested?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No <input type="checkbox"/> N/A
Are samples within holding time for analyses requested?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Are the correct sample containers used for the analyses requested?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Is there sufficient sample to perform testing?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Does any sample contain product, have strong odor or are otherwise suspected to be hot?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No

Quicklog

Are the Sample ID's indicated:	<input type="checkbox"/> On COC	<input type="checkbox"/> On sample container(s)	<input checked="" type="checkbox"/> On Both	<input type="checkbox"/> Not indicated
If Sample ID's are listed on both COC and containers, do they all match?	<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No	<input type="checkbox"/> N/A	
Is the Project ID indicated:	<input type="checkbox"/> On COC	<input type="checkbox"/> On sample container(s)	<input checked="" type="checkbox"/> On Both	<input type="checkbox"/> Not indicated
If project ID is listed on both COC and containers, do they all match?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> N/A	
Are the sample collection dates indicated:	<input type="checkbox"/> On COC	<input type="checkbox"/> On sample container(s)	<input checked="" type="checkbox"/> On Both	<input type="checkbox"/> Not indicated
If collection dates are listed on both COC and containers, do they all match?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> N/A	
Are the sample collection times indicated:	<input type="checkbox"/> On COC	<input type="checkbox"/> On sample container(s)	<input checked="" type="checkbox"/> On Both	<input type="checkbox"/> Not indicated
If collection times are listed on both COC and containers, do they all match?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> N/A	

COMMENTS: One VOA for sample -10 received unlabeled - client advised me to keep these VOAs together and not to use unless necessary - SR will write it VOA S of 5. TJB 120409
