Re: Eden Consolidated Fire District  
EES Project No. 4303F

Dear Larry:

Attached are the soil sample results obtained from the recent tank excavation operations at 1490 164th Avenue located in San Leandro, California. Sample No. 1 is from the south end of the excavation. Sample No. 2 is taken from the north end of the excavation. Enesco Environmental Services, Inc. (EES) intends to excavate all visible contaminated soil located within the open waste oil tank excavation. Excavated soil will be stockpiled on visqueen and then disposed of at an appropriate Class I disposal facility. Two soil samples will be taken from the bottom of the excavation and composited for analysis. Pending favorable analytical results, the excavation will be backfilled and the surface will be finished to match the existing surrounding surface.

Sincerely,  
Enesco Environmental Services, Inc.

Mark Hallock  
Field Operations Supervisor
