Re: 3609 International Boulevard, Oakland, California 94601
Wastewater Discharge Permit No. 504-27421

Dear Ms. Comeaux:

Enclosed is SOMA's "Semi-Annual Technical Report: Treatment System Discharge to EBMUD Sewer for Permit No. 504-27421 from January through June 2009" for the subject site. This report has been uploaded to the State's GeoTracker database.

Thank you for your time in reviewing our report. If you have any questions or comments, please call me at (925) 734-6400.

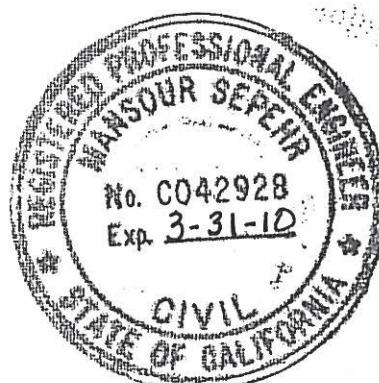

Sincerely,

A handwritten signature in black ink, appearing to read "Mansour Sepehr".

CERTIFICATION

SOMA Environmental Engineering, Inc. has prepared this report on behalf of Mr. Abolghassem Razi, property owner of 3609 International Boulevard, Oakland, California, to comply with East Bay Municipal Utility District requirements for discharge of extracted and treated groundwater resulting from cleanup of groundwater polluted by fuel leaks and other related wastes.

Mansour Sepehr, PhD, PE
Principal Hydrogeologist

LIST OF APPENDICES

Appendix A: Laboratory Results and Chain of Custody Forms for Treatment System Samples

1. INTRODUCTION

This report presents a record of wastewater discharged from the remediation system located at 3609 International Boulevard, Oakland, California into the East Bay Municipal Utility District (EBMUD) sewer system from January through June 2009. The treatment system is operated by SOMA Environmental Engineering, Inc. (SOMA). SOMA prepared this report on behalf of Mr. Abolghassem Razi, the property owner.

2. TREATMENT SYSTEM OPERATION

The treatment system began operating on December 6, 1999. Approximately 4,252,870 gallons of groundwater have been treated and discharged into the EBMUD sewer system (as of June 22, 2009).

SOMA has conducted regular maintenance and sampling of the treatment system since system startup. Influent samples have been collected from the 200-gallon holding tank. Samples have been collected from effluent of the 2,000-pound granular activated carbon unit (GAC-1) and the treatment system effluent (PSP#1).

Table 1 shows the total volume of effluent discharged into the EBMUD sewer system, laboratory analysis results of samples collected from effluent of the GAC-1 unit and the treatment system, and pertinent maintenance history.

Appendix A includes laboratory reports for treatment system samples collected from January through June 2009.

3. CONCLUSIONS AND RECOMMENDATIONS

From the last reporting date, December 22, 2008 to June 22, 2009, approximately 228,309 gallons of groundwater have been treated and discharged into the on-site sewer main;

1. The permit specifies an allowable discharge rate of approximately 1,900 gallons per day. During this reporting period, approximately 1,254 gallons/day were discharged to the site sewer main.
2. Therefore, based on the discharge flow rate and non-detectable system effluent concentration levels, the remedial system has remained in compliance with the EBMUD permit conditions.

Pumping began on December 6, 1999								

Notes:

1 The designator "Effluent" used on sampling and laboratory documents refers to samples collected from PSP #1.

2 MTBE was analyzed using EPA Method 8260B, prior to the September 2003. After September 2003, MtBE was only analyzed by EPA Method 8021B.

3 Lab data as shown for Oct. 2002 is erroneous data. During lab analysis a high detection of 2-Butanone was detected in only the effluent sample. The influent sample for 2-Butanone was at only 20 ppb. This caused a high dilution factor causing a high non-detectable value. The high TPH-g value was misrepresentative due to the Y and Z flags.

ND, < : Not Detected above laboratory reporting limits

NA: Not Analyzed

NR: Not recorded. Totalizer reading not recorded.

Y: Sample exhibits fuel pattern which does not resemble standard

Z: Sample exhibits unknown single peak or peaks

CASE NARRATIVE

Laboratory number: **210702**
Client: **SOMA Environmental Engineering Inc.**
Project: **2333**
Location: **3609 International Blvd**
Request Date: **03/17/09**
Samples Received: **03/17/09**

This data package contains sample and QC results for three water samples, requested for the above referenced project on 03/17/09. The samples were received cold and intact.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

CASE NARRATIVE

Laboratory number: **212766**
Client: **SOMA Environmental Engineering Inc.**
Project: **2333**
Location: **3609 International Blvd**
Request Date: **06/10/09**
Samples Received: **06/10/09**

This data package contains sample and QC results for three water samples, requested for the above referenced project on 06/10/09. The samples were received cold and intact.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

| 2A. Were custody seals present? ... <input type="checkbox"/> YES (circle) on cooler on samples | <input type="checkbox"/> | NO | |
| How many _____ Name _____ | Date _____ | | |
| 2B. Were custody seals intact upon arrival? | <input type="checkbox"/> YES | <input type="checkbox"/> NO | N/A |
| 3. Were custody papers dry and intact when received? | <input type="checkbox"/> YES | <input type="checkbox"/> NO | |
| 4. Were custody papers filled out properly (ink, signed, etc)? | <input type="checkbox"/> YES | <input type="checkbox"/> NO | |
| 5. Is the project identifiable from custody papers? (If so fill out top of form) | <input type="checkbox"/> YES | <input type="checkbox"/> NO | |
| 6. Indicate the packing in cooler: (if other, describe) | | | |

<input type="checkbox"/> Bubble Wrap	<input type="checkbox"/> Foam blocks	<input type="checkbox"/> Bags	<input type="checkbox"/> None
<input type="checkbox"/> Cloth material	<input type="checkbox"/> Cardboard	<input type="checkbox"/> Styrofoam	<input type="checkbox"/> Paper towels

7. Temperature documentation:

Type of ice used: Wet Blue/Gel None Temp(°C) _____

Samples Received on ice & cold without a temperature blank

Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? YES NO
If YES, what time were they transferred to freezer?

9. Did all bottles arrive unbroken/unopened? YES NO

10. Are samples in the appropriate containers for indicated tests? YES NO

11. Are sample labels present, in good condition and complete? YES NO

12. Do the sample labels agree with custody papers? YES NO

13. Was sufficient amount of sample sent for tests requested? YES NO

14. Are the samples appropriately preserved? YES NO N/A

15. Are bubbles > 6mm absent in VOA samples? YES NO N/A

16. Was the client contacted concerning this sample delivery? YES NO
If YES, Who was called? By _____ Date: _____
