Subject: Drilling Work Complete - Borsuk 540188

Dear Mark and Jerry:

Drilling and vapor probe installations were finished today (Tuesday, 9/1/09) at the Borsuk site. This assumes that we can use soil vapor probe SV-8 to characterize soil gas in the area of the former waste oil tanks (in basement of garage). The next phase is to collect soil vapor samples and submit a site characterization report.

Sincerely,

Mark Jonas
