**Subject:** Revised submittal date for Sensitive Receptor Survey, 1432 Harrison St (Fuel Leak Case No. RO0000266)

Per our conversation this morning, we are requesting a revised submittal date of May 14, 2010 for the Sensitive Receptor Survey (SRS) requested in your letter of January 26, 2010. The reason for this request is that we are still receiving, daily, additional responses to the questionnaire sent to nearby property owners regarding the presence of well, basements, vaults, etc. associated with their buildings. To confirm your acceptance of this revised due date, please send an email response for our records.

Also, I told you that the First Semi-Annual Groundwater Monitoring Report would be uploaded to the ACEH and State Geotracker website by the close of business on Friday, April 30, 2010. I noticed as I was looking through our server files that we have already completed and uploaded that document. I don't know whether it's age or workload, but I wish I could keep all my projects and submittals straight!

Anyway, in the recommendation section of the SRS we will suggest the installation of an additional well along the western side of Harrison St. To insure reimbursement potential for our client, we request that you send a letter stating that you agree with this proposal and offer a submittal due date for a workplan of this well installation.

Thank you again for your time this morning and we look forward to continuing to work with you on this project.

Bob Foss
