SUBJECT: IVQ01 Monitoring Report
1432 Harrison Street, Oakland, CA 94612
SITE ID 498

Dear Mr. Peacock:

Attached is the IVQ01 groundwater monitoring data for the above site. If you have a question, please contact me.

Sincerely yours,

Mark Borsuk

Re: **Groundwater Monitoring Report**
Fourth Quarter 2001
1432 Harrison Street
Oakland, California
Cambria Project #540-0188

Dear Mr. Borsuk:

As you requested, Cambria Environmental Technology, Inc. (Cambria) is submitting this groundwater monitoring report for the above-referenced site. Presented in the report are the fourth quarter 2001 activities and results and the anticipated first quarter 2002 activities. Attached are two additional copies for submittal to the regulatory agency.

If you have any questions or comments regarding this report, please call me at (510) 450-1983.

Sincerely,
Cambria Environmental Technology, Inc.

Ron Scheele, RG
Senior Geologist

GROUNDWATER MONITORING REPORT

FOURTH QUARTER 2002

**1432 Harrison Street
Oakland, California
Cambria Project #540-0188-030**

January 31, 2002

INTRODUCTION

On behalf of Mr. Mark Borsuk, Esq., Cambria Environmental Technology, Inc. (Cambria) is submitting this groundwater monitoring report for the above-referenced site (see Figure 1). Presented below are the fourth quarter 2001 activities and results and the anticipated first quarter 2002 activities.

FOURTH QUARTER 2001 ACTIVITIES AND RESULTS

Monitoring Activities

Field Activities: On October 25, 2001, Cambria conducted quarterly monitoring activities. Cambria gauged and inspected for separate-phase hydrocarbons (SPH) wells MW-1 through MW-6 (see Figure 1). Groundwater samples were collected from all wells not containing SPH. Field Data Sheets are presented as Appendix A.

Sample Analyses: Groundwater samples were analyzed for total petroleum hydrocarbons as gasoline (TPHg) by modified EPA Method 8015, and benzene, toluene, ethylbenzene, and xylenes (BTEX), and methyl tertiary butyl ether (MTBE) by EPA Method 8020. Any samples containing MTBE were further analyzed for MTBE using EPA Method 8260. Analytical results are included as Appendix B. Groundwater elevations are shown on Figure 1.

Monitoring Results

Groundwater Flow Direction: Based on depth-to-water measurements collected during Cambria's October 25, 2001 site visit, groundwater flow beneath the site is divided. On the south side of the former USTs, groundwater flows toward the south-southwest at a rate of 0.020 feet/feet, while on the north side of the former USTs, groundwater flows toward the north-northeast at a rate of 0.015 feet/feet (Figure 1). This is consistent with historical groundwater flow rates and directions.

Fourth Quarter 2001 Monitoring Report
1432 Harrison Street
Oakland, California
January 25, 2002

Hydrocarbon Distribution in Groundwater: Hydrocarbon concentrations detected this quarter are consistent with previous sampling events. No SPH were detected in any of the wells. The maximum TPHg and benzene concentrations were detected in well MW-1 at 160,000 and 22,000 micrograms per liter ($\mu\text{g/L}$), respectively. No MTBE concentrations were detected in any of the wells at the site.

Corrective Action Activities

Remediation System: Cambria has completed installation and startup of a soil vapor extraction/air sparging (SVE/AS) system during the fourth quarter 2001. A System Startup Report dated January 17, 2002 was prepared and submitted to the appropriate agencies.

ANTICIPATED FIRST QUARTER 2002 ACTIVITIES

Groundwater Sampling: Cambria will gauge all wells, check the wells for SPH, and collect groundwater samples from wells MW-1, MW-2, MW-4, MW-5, and MW-6. Groundwater samples will be analyzed for TPHg by Modified EPA Method 8015 and BTEX and MTBE by EPA Method 8020. Any samples containing MTBE will be confirmed by EPA Method 8260. Cambria will prepare a groundwater monitoring report summarizing the monitoring activities and results.

Remediation System: Cambria will perform operation and maintenance of the remediation system during the first quarter 2002. Cambria will also evaluate the performance of the remediation system and combine the results in a 1st Quarter 2001, Groundwater Monitoring and System Progress Report. Included in the report will be tables summarizing the concentration, flow, and vacuum of system and individual wells, along with the analytical results.

Cambria also wishes to reduce the sampling frequency of wells MW-3 and MW-6. Both wells have had a no detectable hydrocarbon concentrations during the last 6 sampling events. Cambria plans to reduce the sampling frequency to an annual basis, if there is no objection to our request.

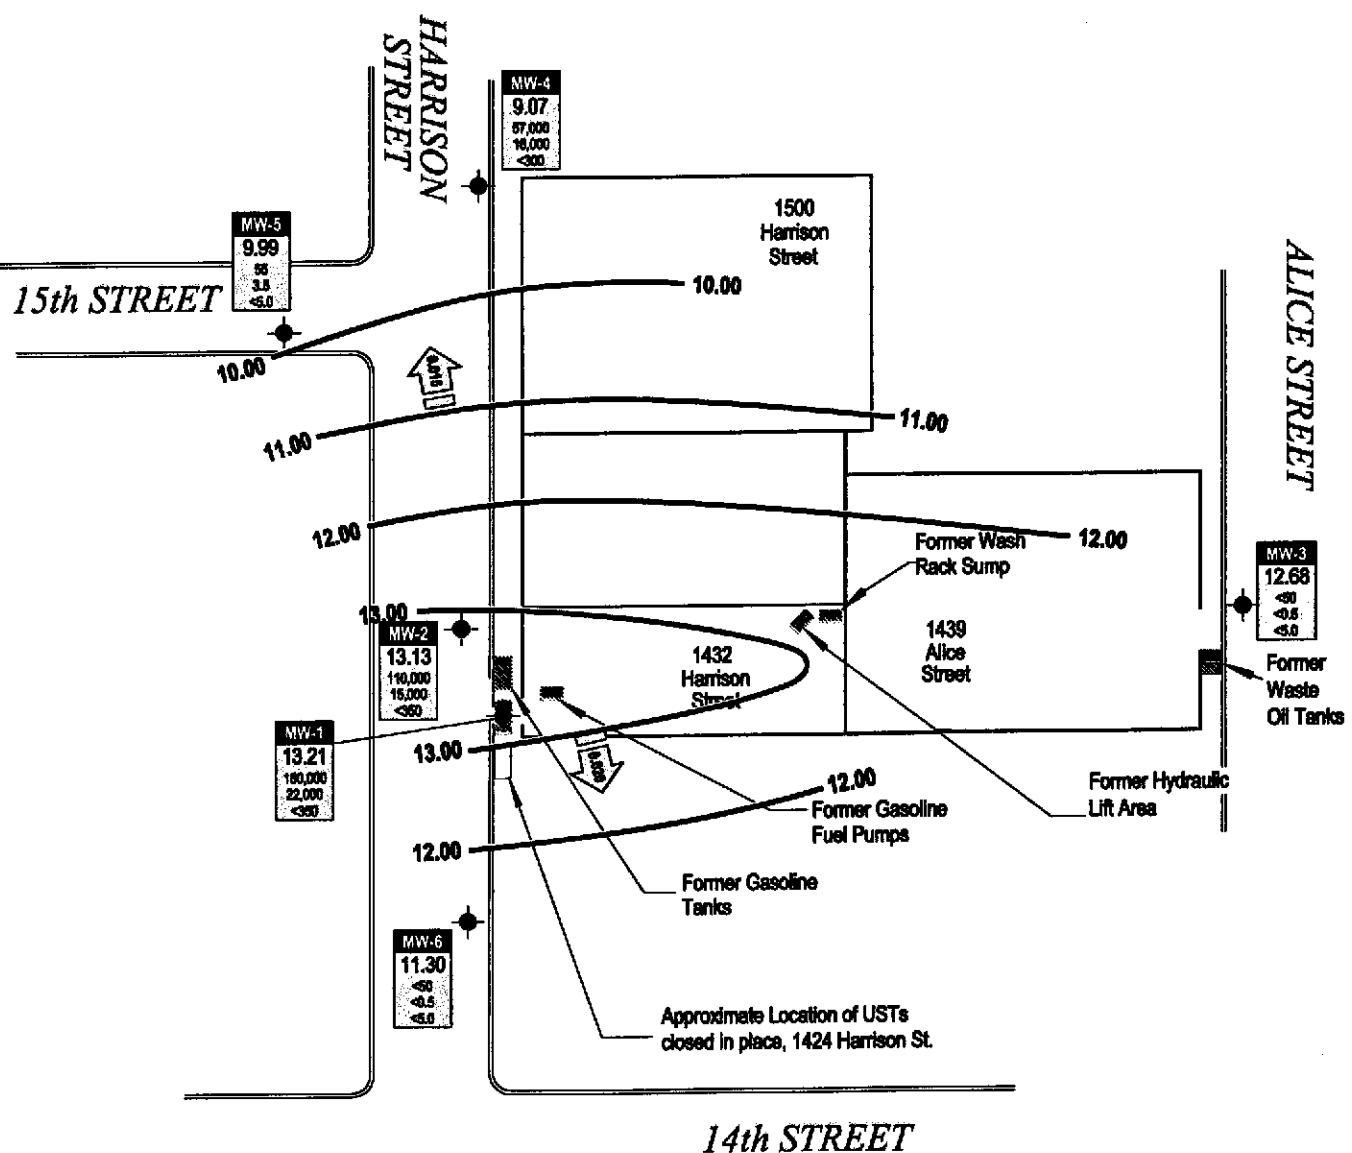

APPENDICES

Figure 1 - Groundwater Elevation and Analytical Summary

Table 1 - Groundwater Elevations and Analytical Data

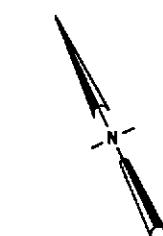

Appendix A – Groundwater Monitoring Field Data Sheets

Appendix B - Laboratory Analytical Results

EXPLANATION

- Groundwater monitoring well
- Groundwater elevation contour, in feet above msl, dashed where inferred
- Groundwater flow direction and gradient
- Well designation
- Well ID
- ELEV: Groundwater elevation, in feet above mean sea level (msl)
- TPH: Total Petroleum Hydrocarbons
- MTBE: MTBE analysis by EPA Method 8020.

Abbreviations

TPHg = Total petroleum hydrocarbons as gasoline by EPA method Modified 8015.

Benzene, toluene, ethylbenzene, xylenes by EPA method 8020.

-- = Not Sampled/Not Analyzed

<n = Not detected in sample above n μg/l.

ND = Not detected at minimum quantitation limit. See laboratory reports.

μg/l = micrograms per liter

MTBE = Methyl tert-butyl ether

* = MTBE by EPA Method 8020

** = MTBE by EPA Method 8240

*** = MTBE by EPA Method 8260

VOCs = volatile organic compounds

Notes

a = Unmodified or weakly modified gasoline is significant.

b = Lighter than water immiscible sheen is present.

c = Liquid sample that contains greater than ~5 vol. % sediment.

d = MTBE result confirmed by secondary column or GC/MS analysis.

e = Sample analyzed for purgeable hydrocarbons by EPA method 8010, no purgeable halocarbons were detected.

f = Sample analyzed for VOCs by EPA method 8240, no non-BTEX compounds were detected.

g = Sample analyzed for Total Petroleum Hydrocarbons as motor oil (TPHmo) by EPA method Modified 8015, no TPHmo was detected.

h = Analytic sampling discontinued. Approved by Alameda County Department of Environmental Health.

i = Lighter than gasoline range compounds are significant.

j = Gasoline range compounds having broad chromatographic peaks are significant.

k = No recognizable pattern.

l = Sample diluted due to high organic content.

m= Liquid sample that contains greather than 5 vol. % sediment.

Cambria Environmental Technology 6262 Hollis Street Emeryville, CA 94608	Client Project ID: #540-0188; Borsuk	Date Sampled: 10/25/01
	Client Contact: Ron Scheele	Date Extracted: 10/30/01
	Client P.O:	Date Analyzed: 10/30/01

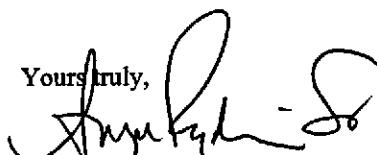

11/06/01

Dear Ron:

Enclosed are:

- 1). the results of 6 samples from your #540-0188; Borsuk project,
- 2). a QC report for the above samples
- 3). a copy of the chain of custody, and
- 4). a bill for analytical services.

All analyses were completed satisfactorily and all QC samples were found to be within our control limits. If you have any questions please contact me. McCampbell Analytical Laboratories strives for excellence in quality, service and cost. Thank you for your business and I look forward to working with you again.

Yours truly,

Edward Hamilton, Lab Director
