Re: **Investigation Work Plan Addendum**  
Former Exxon Service Station  
3055 35th Avenue  
Oakland, California

Dear Mr. Klettke:

As you requested in our July 16, 1996 phone conversation, Cambria Environmental Technology, Inc. (Cambria) is submitting this workplan addendum to install one additional monitoring well and perform a Tier 2 Risk Based Corrective Action (RBCA) at the site referenced above. We will install a monitoring well in the northwest corner of the property (Figure 1) to further define the extent of hydrocarbons in soil and ground water. The well construction will be similar to the existing wells. We will also collect site-specific data from the well and use the data to prepare a RBCA following the ASTM RBCA format.

Please call if you have any questions or comments.

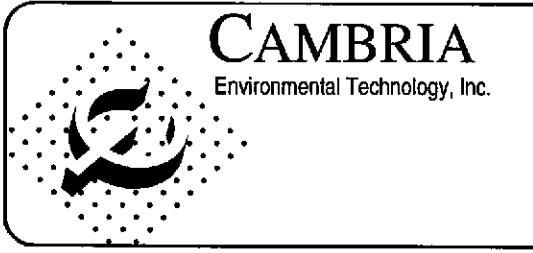

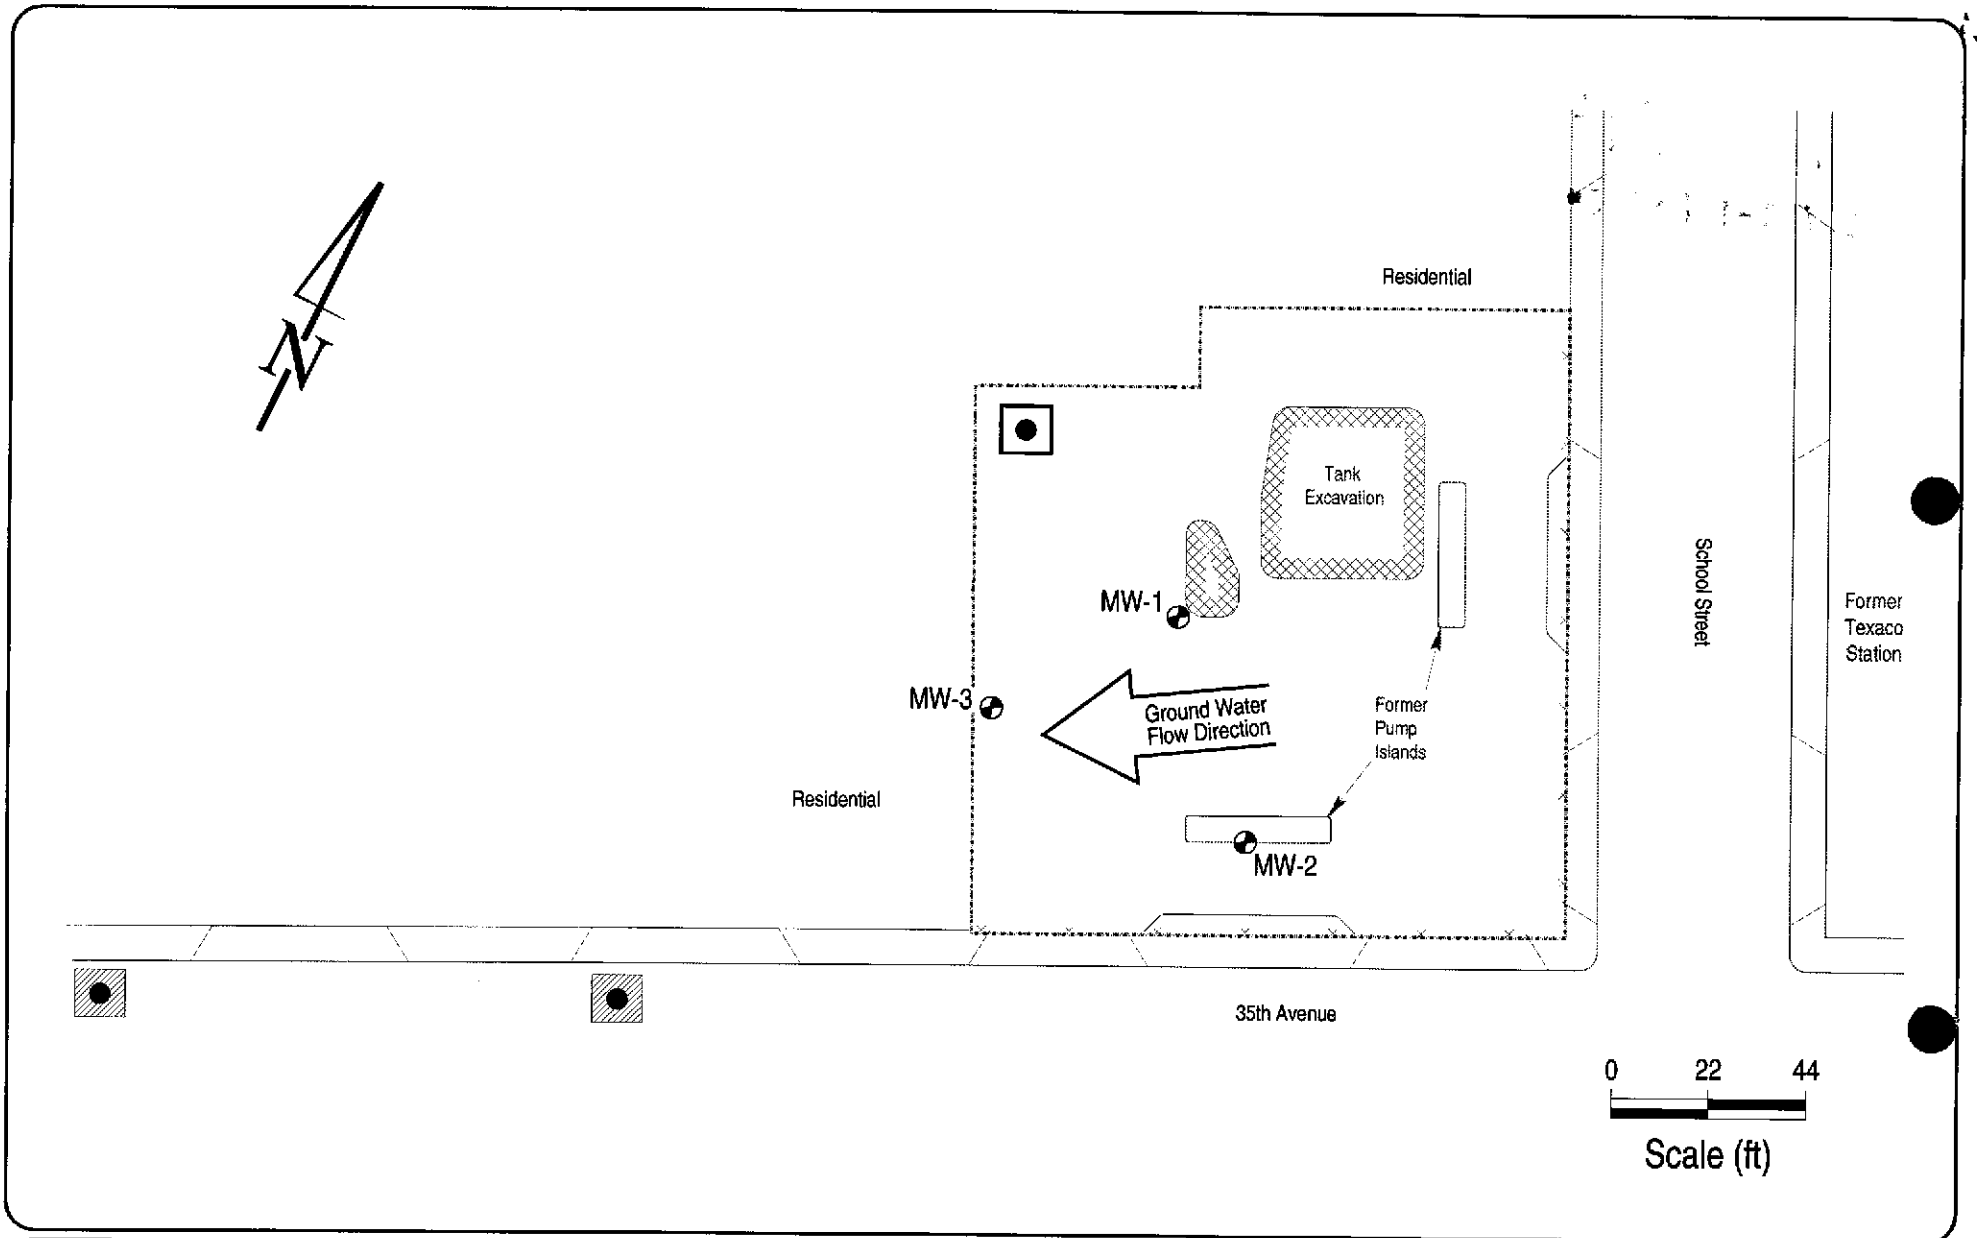

Sincerely,  
Cambria Environmental Technology, Inc.

N. Scott MacLeod, R.G.  
Principal Geologist
