**Re: Former Chevron Service Station #9-2960
2416 Grove Way
Castro Valley, California**

Dear Mr. Seery:

Enclosed is the corrected copy of sampling report 980709-H4 to the Third Quarter Groundwater Monitoring report for 1998 for the above noted site. Also enclosed is the corrected copy of the Cumulative Table of Well Data and Analytical Results for well C-2. Please replace the existing pages with the corrected pages.

This correction was in response to your request to Sequoia Analytical to check the possibility of a data entry error in the above noted sampling report. **Sequoia Analytical did find that the result for TPH-g was incorrectly entered as 1000 ppb instead of the correct amount of 10,000 ppb.** The corrected data was sent to Blaine Tech to correct the original submitted data. Enclosed is a copy of Sequoia Analytical letter to Blaine Tech explaining the reason for the corrections.

Appreciate your diligence in bringing this to our attention so that we could correct the report to insure that all data that is submitted is accurate.

If you have any questions or comments call me at (925) 842-9136.

Sincerely,
CHEVRON PRODUCTS COMPANY

Re: Former Chevron Service Station #9-2960, 2416 Grove Way, Castro Valley, CA.

Dear Mr. Phil Briggs,

Please find attached amended pages to the Third Quarter 1998 sampling report 980709-H-4 for the site listed above. Please replace the existing pages with the amended pages. Also attached is a letter from Sequoia Analytical explaining the reason for these amendments.

If you have any questions or comments, I can be reached at (408) 573-0555, ext. 202.

Sincerely,

Dear Mr. Briggs:

I am writing to you in response to your request for a letter explaining the reason for the data correction on Sequoia Analytical Lab report 9807562-02.

On September 15, 1998, Scott ^{Seery} ~~Cearny~~ from Alameda County called in regards to the TPH-GAS and BTEX results for the above mentioned sample. He wanted me to check the results for the possibility of data entry error. Upon review of the project I found that these samples were subbed out to Star Analytical (part of Sequoia Network). The samples were analyzed there and then faxed back to the Redwood City facility. The results were entered into our SAM system by our data entry person. **I did find that the TPH-GAS result of 1000ppb was incorrect and the correct result was 10,000ppb.** A corrected report was transmitted and sent to Biaine Tech Services for their needs.

I would like to apologize for any inconvenience that this may have caused.

Very truly yours,

Mike Gregory
Project Manager
