Jerry:

We are tentatively scheduled to destroy the four CMT wells at this site (by overdrilling) between February 9 and 17, 2014. A budget change order request to the UST Cleanup Fund to destroy the other wells is pending; if it is not granted, the other wells will be pressure grouted in July, when the new budgets go into effect.

It is my understanding that Zone 7 water agency is considering keeping one well (D-1); please let me know when you hear anything from them about this. I will then prepare a 'well transfer of ownership' document & have it executed between Mr. Angle and a representative of Zone 7. If they don't want the well, we will just pressure grout it with the rest of the wells.

Scott Bittinger
