Debra,

Thanks for the reminder and thanks for the quick conversation on where the site is within your process. Based on the conversation, it appears that a 60 day extension is appropriate, and will allow Green Star to obtain cost estimates for a work plan that is intended to cover the next step(s) at the site. I'll update Geotracker shortly with a December 12, 2014 date.

Mark,

We have finished the groundwater report but we are still evaluating options and waiting on contractors regarding secondary source removal at this site. We are trying to evaluate the best way to move the site to closure and we request a 60-day extension from our current deadline. Thank you.

Mark,

Thank you for returning my call - We are hoping to get to the site to conduct a groundwater monitoring event since we don't have any data since 2001 and wanted to get the most current information before responding to your April 7th letter. Please let me know if you are on board with a groundwater sampling event so that we can get that scheduled as soon as possible. In addition to the groundwater event we wanted to address the potential secondary source and have a few ideas about that. I am available most of next week except Wednesday afternoon –but can we plan on a call and what I promise will be a brief discussion with you on Tuesday at 10am? Let me know if that works for you. Thanks.
