Working on remediation WP Addendum

? Of utility survey, SCM 1.1 says to obtain city maps & pipeline info, apparently ACEH aware, other property owners have some info too.

Requested I provide the info to him, call him back with.

11a, discuss site

Give him background on Mill Springs. In original SCM Bill Fowler had not found all the information re: pipeline & needed to do addtl research. Told Mark that he needs to do this & research ACEH files, City files, Groth Bros site, etc., and any other info. This is part of their work task. Has he discussed site & reports with Bill Fowler? No. Recc. He call Bill.

He said the addendum is due today & he is just starting report today. I asked him if he is asking for an extension? He is. Why is he starting report only now? He has been busy with other projects. Told him that is not sufficient justification for an extension, there are many items that need to be responded to in the WP & they have been provided the time to do that, site is currently out of compliance & other reports late; directive letter was very strong & rejected previous conclusions & requested specific data. Further delays on this site not justified. Polanco Act schedule set for site.
