1131 Harbor Bay Parkway, Suite 250  
Alameda, CA 94502-6577

**SUBJECT: Response To Letter And Request For Corrective Action Time Extension  
Fuel Leak Case Ro0000288: 2655 Grant Avenue, San Lorenzo, CA**

Dear Mr. Plunkett:

The District has reviewed your letter dated November 5, 2007 with its consultant (Sutton) and thanks you for your review of the Interim Corrective Action Plan (ICAP) document submitted. Our letter is intended to provide affirmation that we will address the comments and to formally request an extension of the outlined implementation date. Please refer to the itemized response to your letter presented below.

**Source Area Excavation:** Yes, a PID will be used for monitoring VOCs in the breathing space, and Yes, the side walls and excavation bottom will be sampled and/or grab groundwater samples will be collected for analysis. A (DHS-certified) mobile analytical laboratory will be used for onsite sample analysis, including the list of analytes you included.

**Geotracker EDF Submittals:** The ICAP document is now loaded onto the Geotracker database.

**Schedule:** As you know, the District will be requesting a reimbursement from the State Underground Tank Fund for the subject activities and will request the Fund to indicate in advance of the work whether, and at what level, the Fund will reimburse the District for its expenses. As Fund review typically takes several months and with the onset of winter, the District requests a time extension that will allow the construction work to initiate in Spring 2008 with completion by mid-year.

The District thanks the Agency for its interest in this project. I look forward to meeting you in the near future and to working with you to bring this case to closure.

Please continue to directly contact our consultant, John Sutton, PE, in regard to technical aspects of this closure process. However, do not hesitate to contact me (email: [jwarner@oroloma.org](mailto:jwarner@oroloma.org), or phone: (510) 489-6965) with regard to any administrative issues.

Respectfully submitted

Jason Warner, PE  
District Engineer
