Subject: Fuel Leak Case No. RO0000293, City of Oakland Municipal Service Center, 7101 Edgewater Drive, Oakland

Hi Gopal and Mark:

Thank-you coming to the our office today to discuss the path to closure for the City of Oakland's Municipal Service Center fuel leak case. It was a productive meeting and a pleasure to meet you both and your consultants. As discussed in today's meeting, lets plan on scheduling a meeting in August after you have collected another round of groundwater sampling results and have digested some of the information we discussed today including addressing the high benzene concentrations in wells, validating the monitoring well network with respect to producing valid concentration data and free product observations, updating the risk assessment to include the May 2013 ESLs, synthesizing the soil data to address the fill issues, potential rebound in wells where ozone has been injected, and plume length delineation. I have attached a word file with an example of a tabular SCM for your use and will forward you the Data Gap Identification Tool (DGIT) in separate emails as the file is too large to send in one email.

I could meet with your team on August 2 or 9 to discuss your findings. Please let me know if either of these dates works for you and I will reserve the conference room.

I look forward to our next meeting.

Thanks,

Dilan Roe, P.E.

Dilan,

Just wondering, if you have a projector at your office that we could use for the presentation this afternoon?

Hi Gopal:

I think having a meeting before you submit the request for closure is a great idea. The next two weeks are quite busy for me but I could meet the week of the 17th. Monday June 17 or Friday June 21 in the afternoon would be the best for me. Please let me know if either of these days works for you. I look forward to discussing the site with you.

Thank-you

Dilan Roe, P.E.

Dilan,

I'm following up on our conversation from couple of weeks ago about the LOP case for 7101 Edgewater Drive in Oakland (**RO0000293**). We are in the process of submitting a site closure request/ report, and would like to meet with you for a presentation and discussion about the site. Please let me know, if you prefer to have a discussion before or after we submit the report.

Thanks.

Hi Gopal: I solved the mystery! The case is ours and your case worker is Dilan Roe, who is cc'd. Evidently this case is an LOP case AND a Site Cleanup Program (SCP) case, I clicked on the green dot on the Geotracker map which was a SCP case, which indicated a RWQCB lead. The red dot indicates an LOP case with our oversight.

Thank you,
