Subject: RE: Upcoming Work at 7101 Edgewater Drive Oakland Site / Case RO293

Hi Anna,

Thank you for the notification of field work. As our agency conditionally approved your work plan in our letter dated October 18, 2017, and your letter of November 3, 2017 included your acceptance of all ACDEH's conditions, it was our assumption the work plan was being implemented. Thank you for the clarification of our misunderstanding.

Please perform the next phase of work as conditionally agreed to.

Regards,
Keith Nowell

Subject: Upcoming Work at 7101 Edgewater Drive Oakland Site / Case RO293

Keith,

Terraphase Engineering, Inc., on behalf of the City of Oakland, will be initiating subsurface investigation at the 7101 Edgewater Drive Site / Case RO293 on this coming Monday, January 8th. This work will be conducted in accordance with the *Additional Investigation Work Plan*, prepared by Terraphase and dated September 8, 2017, and the *Response to Comments, Soil Gas Data Submittal, and Scope of Work for Sub-Slab Soil Gas Sampling*, dated November 3, 2017. Work is expected to continue for approximately two weeks, and will consist of site-wide Membrane Interface Probe (MIP) borings and grab groundwater confirmation sampling. Although we have not received a response to our November 3rd submission, we are assuming that we can proceed with the proposed schedule, given that the County has provided a conditional approval of the Work Plan.

Please contact us if you have any questions or concerns regarding this work.

Best,

Anna W. Behrens

Project Geologist
