## **ACTIVITY RECORD**

RO #: 0000293

DATE: Wednesday, June 04, 2008

TIME: 10:00 AM

Meeting **Site Visit/Inspection Telephone Conversation Document Review Peer Review** 

**HAZ MAT SPECIALIST:** Paresh C. Khatri

Work Location: 1131 Harbor Bay Pkwy, Alameda

Conferee('s): Gopal Nair

Dawn Crater

Phone #

SITE NAME & ADDRESS: City of Oakland Municipal Service Center 7101 Edgewater **Drive, Oakland** 

**TOPIC: Site Visit** 

**SUMMARY:** 

Met with Gopal Nair (City of Oakland, RP contact), Dawn Crater (Port of Oakland, property owner), and Xinggang Tong (Operations and maintenance consultant). We walked through the site and noted the locations of the four plume areas at the site. According to Xinggang, the amount of free product recovered at the site has dropped significantly since the initiation of the DPE system in the Plume D location at the site. Hydrogen peroxide injection at 7.5 % concentrations is being "free falled" into wells at the other plume locations. Another hydrogen peroxide injection event is scheduled for next month. Xinggang said that the treatment system would probably run one more year and then be shutdown.

I discussed the reports submitted for the site with Gopal and requested that the reports include an analysis of the effectiveness of the treatment system, including gallons and concentration of influent, effluent, the amount of product recovered, etc. Gopal said that they would include that information in the upcoming reports.

I also suggested that they initiate some limited groundwater monitoring to assess the plume while the system is operating. This would also demonstrate system effectiveness. Gopal and Xinggang agreed.
