Trevor,

Thank you for the updates as to the status of the site. Based on the extend period time it took to obtain offsite access ACEH is in agreement with the requested extension. I have updated Geotracker with a delivery date of November 21, 2014, slightly longer than requested based on the drilling dates. Please use this email to document the extension should it be needed.

Good Afternoon Mark,

I received your message earlier and would like to notify you that drilling has been scheduled for September 25th and 26th. We plan on sampling the soil vapor points the following week. Based on this schedule, we would like to extend the deadline for submittal of results to November 14, 2014 to allow for sufficient time to receive laboratory analytical results and prepare a results report.

If you have any questions or need additional information, please feel free to contact me.

Thank you,

Trevor Hartwell, P.G.
