Subject: Fuel Leak Case No. RO0000304 and Geotracker Global ID T0600100355, CHEVRON #9-2582, 7240 DUBLIN BLVD, Dublin CA 94568 – Groundwater Monitoring Requirements

Dear Responsible Party(ies):

The purpose of this correspondence is to inform you of changes to groundwater monitoring requirements for all fuel leak cases in California. The California State Water Resources Control Board (State Water Board) has approved Resolution No. 2009-0042 (*Actions to Improve Administration of the UST Cleanup Fund and UST Cleanup Program*). Resolution No. 2009-0042 states that, "Regional Water Board and LOP agencies shall reduce quarterly groundwater monitoring requirements to semiannual or less frequent monitoring at all site unless site-specific needs warrant otherwise and shall notify all responsible parties of the new requirements no later than August 1, 2009. If more than semiannual monitoring is required for a case, the responsible party and State Water board shall be notified of the rationale and the notice shall be posted on Geotracker."

Upon review of your site, we find the following site-specific conditions that warrant continuation of quarterly groundwater monitoring:

- Quarterly monitoring of six (6) key groundwater monitoring wells (MW-1, MW-2, MW-3A, MW-6A, MW-7AA, and MW-8A) is necessary to evaluate the results of the dual-phase extraction system.
- Annual monitoring (first quarter of each year) of all sixteen (16) site wells located in the upper, shallow (AA-zone), shallow (A-zone), and/or intermediate-depth (B-zone) groundwater zones appears sufficient.

If you believe that continued quarterly groundwater monitoring for your site is not warranted, you may submit a proposal for a revised sampling and analysis schedule along with your technical rationale supporting the proposal.

If you have any questions, please call me at (510) 777-2478 or send me an electronic mail message at paresh.khatri@acgov.org.

Sincerely,

Paresh C. Khatri
Hazardous Materials Specialist
