Pleasanton, California 94566

SUBJECT: Aboveground Storage Tank Closure Report
461 McGraw Avenue
Livermore, California
EIS Project #717-2

Dear Mr. Rigter:

On behalf of Whitney Newland, administrator of the Estate of Crandal Mackey, Environmental Investigation Services Inc. (EIS) is submitting this report to document the closure of three aboveground storage tanks at 461 McGraw Avenue, Livermore, California.

The site is located northeast of the intersection of McGraw Avenue and Preston Avenue in Livermore, Alameda County, California. The nearest surface water is Arroyo Seco, located approximately ½ mile south of the site. Water in Arroyo Seco flows to the northwest. The site location is shown on Figure 1. The site is currently vacant, but was formerly used by Call Mac Transportation as a truck storage and salvage yard. Figure 2 depicts the site plan, including features of concern, and Figure 3 is a detail map showing the vicinity of the former aboveground storage tanks (AST), including the former AST locations, the excavation boundaries and the confirmation soil sample locations. Photographs documenting the AST removal activities are included in Attachment A.

BACKGROUND

On July 17, 2003, LPFD conducted a hazardous materials inspection of the site, which is described in their *Hazardous Materials Inspection Report Narrative, Call Mac Transportation, 461 McGraw Ave., Livermore*. The LPFD document states that a large number of containers of hazardous materials and/or hazardous waste were observed onsite, both inside trailers and on the ground, and notes that several ASTs are present onsite. Improper storage practices, security issues, and fire hazards were noted at the site, all of which increase the odds that hazardous substances will be or have been released to the environment.

According to the Department of Toxic Substances Control's (DTSC) *Inspection Report, Call Mac Transportation, 461 McGraw Road, Livermore, California 94551* issued December 2, 2003, DTSC conducted a site inspection on November 13, 2003, to take an inventory of hazardous waste onsite that would be used to select sampling points for a future site visit.

DTSC conducted their next site visit on November 20, 2003, during which they collected a total of twelve samples of suspected hazardous materials, hazardous wastes, and suspected release locations (stained soil). The sampling and sample results are described in DTSC's *Sampling Report, Call Mac Transportation, 461 McGraw Road, Livermore, California 94551* (January 6, 2004). Samples collected from ASTs T-1 and T-2, as well as from the soil in the vicinities of the ASTs, contained high concentrations of petroleum hydrocarbons, and one soil sample collected from former AST location T-4 contained a high concentration of arsenic, but they were determined not to be hazardous waste.

On April 2, 2007, Applied Remedial Technologies (ART) submitted *Work Plan to Remove the Three Remaining Storage Tanks, 461 McGraw Avenue, Livermore, California 94550* to LPFD, outlining procedures for decommissioning and disposing of the ASTs and their contents, and for sampling the soil beneath the ASTs. The DTSC's 2004 Sampling Report includes data from soil samples collected from underneath two of the ASTs; the data showed that the soil under the ASTs had been impacted, and that overexcavation would be required.

ART described their proposed overexcavation of the contaminated soil under the ASTs in *Proposed Work Plan to Conduct Soil Removal and Confirmation Sampling of the Impacted Soils at the Former Diesel UST Dispenser Island, Below the Former Above Ground Storage Tanks, and at the Recent Diesel Spill Areas, 461 McGraw Avenue, Livermore, California, 94550*, which they submitted to ACEH April 2, 2007. In this workplan, ART describes plans to remove the concrete pad and former pump station and to excavate any contaminated soil they find underneath. ART also included a plan to excavate surface diesel and oil stains from Golden State Metals, Inc.'s (Golden State) demolition of the vehicles stored onsite, and to collect a water sample from the well in the northeastern corner of the site.

In their April 10, 2007, plan check of ART's *Work Plan to Remove the Three Remaining Storage Tanks, 461 McGraw Avenue, Livermore, California 94550*, LPFD approved the workplan for the AST removals, contingent upon approval by ACEH's approval of *Proposed Work Plan to Conduct Soil Removal and Confirmation Sampling of Impacted Soils at the former Diesel UST Dispenser Island, Below the Former Above Ground Storage Tanks, and at the recent Diesel Spill Areas, 461 McGraw Avenue, Livermore, CA 94550*. The plan check specifies that soil samples must be collected within two working days of the AST removals, and that ACEH will be responsible for overseeing the soil sampling.

ACEH issued the letter, *Fuel Leak Case No. RO0000311 and Geotracker Global ID T0600102204, Call Mac Transportation, 461 McGraw Avenue, Livermore, CA 94550* on April 11, 2007, requesting revisions regarding the excavation and sampling in the vicinity of

the former pump island, the AST excavations and sampling, the excavations and sampling of the surface stains from Golden State's demolition activities, and the water well sampling. In addition, ACEH requested that the workplan include collecting eight samples from the soil loading dock, eight samples from the former lead-acid battery storage area near the building pad, two samples from the former storage container location, and two samples from the soil building pad. Finally, ACEH requested six soil borings, with grab groundwater samples collected from each, and soil samples collected where relevant.

On May 18, 2007, EIS issued *Revised Workplan for Site Investigation and Remedial Action, 461 McGraw Avenue, Livermore, California 94550*, which included all of the revisions to the plans for the proposed excavations that ACEH requested, proposed surface sample locations and sampling methods consistent with ACEH requirements, and proposed and described plans for six soil borings, as requested by ACEH.

On May 23, 2007, EIS issued *Clarification of Revised Workplan for Site Investigation and Remedial Action, 461d McGraw Avenue, Livermore, California*, at the request of LPFD. In this letter, EIS confirmed their plan to follow ART's April 10, 2007, *Work Plan to Remove the Three Remaining Storage Tanks, 461 McGraw Avenue, Livermore, California 94550*, and that Macoy Resources Corporation would be the tank removal contractor.

ACEH approved *Revised Workplan for Site Investigation and Remedial Action, 461 McGraw Avenue, Livermore, California 94550* on May 23, 2007, in the letter, *Fuel Leak Case No. RO0000311 and Geotracker Global ID T0600102204, Call Mac Transportation, 461 McGraw Avenue, Livermore, California 94550 – Work Plan Approval*.

The City of Livermore Community Development Department issued Building Permit Number DEM7014 to remove three aboveground tanks on May 29, 2007. A copy of the building permit is included in Attachment B.

FIELD ACTIVITIES

Preparation of Aboveground Storage Tanks for Removal

On May 30 through May 31, 2007, Macoy Resources Corporation (MRC), of Paso Robles, California, prepared the three ASTs for removal.

AST T-1 was a 4,000-gallon tank, 34 feet long and 4.5 feet in diameter. The tank was rusted, and the walls of the tank had deteriorated in places. Near the center of the tank, a large hole, approximately two to three feet long, had been made in the wall of the tank in an area where it appeared to be in especially poor condition. Tank T-1 was filled to approximately 1.5 feet from the bottom of the tank with solid material resembling tar or asphalt. To prepare tank T-1 for removal, MRC cut it open and removed the top half of the tank to the ground nearby. Using hand shovels, MRC removed the contents of the tank, stockpiled it on plastic, and covered it with plastic, pending disposal. Once the tank had been emptied, MRC cut the steel tank into pieces that could fit into a roll-off bin for disposal as non-Resource Conservation and Recovery Act (RCRA) hazardous waste solid on the following day. The contents of AST T-1 (approximately 13.3 tons of material) were transported to Chemical Waste Management of Kettleman City, California, as non-RCRA

hazardous waste under hazardous waste manifest 002068763 JJK on June 29, 2007 (Attachment C).

AST T-2 was a 5,000-gallon tank, 14 feet long and 8 feet in diameter. The tank was rusted, with a couple of holes in the bottom; the tank was resting on its side so that the holes were above the surface level of the tank's contents. An OPW brand ball and cage float overfill prevention device was affixed to the top of the tank. The presence of this device suggests that tank T-2 was formerly an underground storage tank (UST). On May 30, 2007, Asbury Environmental Services (AES) pumped approximately 150 gallons of used oil/mixed oils from AST T-2. AES transported the liquid contents of the AST to Alviso Independent Oil of Alviso, California, under hazardous waste manifest number 002105111 JJK (Attachment C).

AST T-3 was an approximately 5,500-gallon tank car, with the tank measuring 25 feet long, 7 feet wide, and 4 feet tall. The tank was rusted, but there were no visible holes in the walls. Piping at the base of the tank was coated in an oily residue, and a bucket had been placed underneath it to catch fluid that had formerly dripped from the pipes. On May 30, 2007, MRC drained approximately 15 gallons of what appeared to be red diesel fuel from AST T-3, into a 55-gallon drum, pending disposal.

Tank Removal Activities

On May 31, 2007, MRC removed the three ASTs from the property under City of Livermore Community Development Department permit number DEM7014. Hazardous Materials Inspector John Rigter of LPFD was present to supervise the AST removal activities (the LPFD AST Closure Document is included in Attachment D).

MRC loaded the remnants of AST T-1 into a roll-off bin for transportation to Ecology Control Industries (ECI) of Richmond, California, as non-RCRA hazardous waste, under manifest number 002141319 JJK (Attachment E).

MRC placed approximately 100 pounds of dry ice in each of ASTs T-2 and T-3 (receipt is included in Attachment F). In the presence of Mr. Rigter, MRC measured the lower explosive limits (LELs) and oxygen contents inside AST T-3 at three different heights. All LEL measurements were 0%, and all oxygen contents were less than or equal to 5%. MRC then loaded tank T-3 onto an ECI truck for transportation to their facility in Richmond, California.

After demonstrating to Mr. Rigter that the LELs and oxygen contents at three different heights in tank T-2 were at acceptable levels, MRC lifted AST T-2 to load it onto the ECI truck. When the AST was lifted, waste oil sludge began to leak out of a hole in the bottom of the tank. After approximately 15 gallons of waste oil sludge had drained into 5-gallon buckets, the hole was plugged with wood, the exterior of the tank was cleaned, and the tank was loaded onto the ECI truck for transportation to their facility in Richmond, California. Once the tank was securely in place on the truck, MRC measured the LELs and oxygen contents of AST T-2 to verify that these values were still within acceptable limits after the waste oil sludge had drained. The LELs were 0% and the oxygen levels were all less than or equal to 5.0%. The ASTs were then transported to the ECI facility in Richmond, California, as non-RCRA hazardous waste under manifest 002141318 JJK.

Once the AST removal activities were complete, the waste oil sludge drained from AST T-2 was transferred to the 55-gallon drum containing the fluid drained from AST T-3. This drum is still being stored onsite pending approval for disposal at an appropriate facility. The manifest for the drum disposal will be forwarded to LPFD once the drum has been removed from the site.

Soil Excavation and Soil Samples

On May 31, 2007, EIS coordinated with MRC to excavate petroleum hydrocarbon-stained soil in the locations of former ASTs T-1, T-2, and T-3, and in a fourth location, T-4, where AST T-1 had previously been located (Figure 3). EIS collected seventeen confirmation soil samples from the four excavations under the direction of Mr. Jerry Wickham, Hazardous Materials Specialist of ACEH. The soil sample locations are shown on Figure 3. Details regarding the excavation and confirmation soil sample collection activities, the analytical results, and the disposal of the contaminated soil will be described in another report to be issued to ACEH. A copy of that report will be sent to LPFD. As a convenience, the analytical results from the confirmation soil samples are also summarized in Tables 1 and 2 of this report, and the analytical report and chain of custody document are included in Attachment G.

CONCLUSIONS AND RECOMMENDATIONS

Based on the AST removal activities and documentation presented in this report, EIS offers the following conclusions and recommendations:

- Three ASTs were removed from the property at 461 McGraw Avenue under City of Livermore Community Development Department permit number DEM07014.
- Approximately 13.3 tons of solid material formerly stored inside AST T-1 were transported to Chemical Waste Management of Kettleman City, California, under non-RCRA hazardous waste manifest number 002068763 JJK.
- AST T-1 was cut into pieces and loaded into a roll-off bin to be transported to the ECI facility in Richmond, California, under non-RCRA hazardous waste manifest number 002141319 JJK.
- Approximately 150 gallons of used oil/mixed oils were removed from AST T-2 by AES and transported to Alviso Independent Oil of Alviso, California, under non-RCRA hazardous waste manifest number 002105111 JJK.
- The combined 30 gallons of liquid and sludge removed from ASTs T-2 and T-3 are being stored onsite in a 55-gallon drum pending approval for disposal at an appropriate facility. The manifest for the drum disposal will be forwarded to LPFD once the drum has been removed from the site.
- ASTs T-2 and T-3 were loaded onto an ECI truck under LPFD supervision and hauled to the ECI facility in Richmond, California, under non-RCRA hazardous waste manifest number 002141318 JJK.
- Contaminated soil in the former AST locations was excavated on May 31, 2007, and seventeen confirmation soil samples were collected under the direction of Mr. Jerry

Wickham, Hazardous Materials Specialist of ACEH. Details regarding excavation and sampling activities, analytical results for the soil samples, and disposal of the contaminated soil will be presented in another report that will be issued to ACEH. A copy of that report will be sent to LPFD.

- EIS recommends that this report be forwarded to the LPFD and to ACEH.

LIMITATIONS

All reports and findings are based on the conditions and practices observed and information made available to Environmental Investigation Services, Inc. Conclusions beyond those stated and reported herein should not be inferred from this document.

Sincerely,

Environmental Investigation Services, Inc.

Jennifer Morris
Professional Geologist #8323

Photographs

1. View of ASTs T-1 (right front), T-2 (right rear), and T-3 (left), facing east.

2. View of AST T-1 from the southwest.

3. View along the eastern side of AST T-1. There is a large hole in the tank near the center, under the tarp.

4. View of AST T-1 from the north, with the northernmost two (of a total of four) chambers cut open. The solid material inside the AST is primarily tar or asphalt, with some soil intermixed.

5. View of the contents of AST T-1.

6. Former AST T-1 after being cut into pieces to be hauled offsite as non-RCRA hazardous waste. The scraps are being loaded into the roll-off bin in the background.

7. View of the side and bottom of AST T-2.

8. View of OPW brand ball and cage float overfill prevention device attached to AST T-2.

9. Waste oil sludge leaking from a hole in AST T-2.

10. AST T-2 loaded onto the ECI truck after the sludge had finished draining, the hole in the tank had been plugged with wood, and the tank had been cleaned off in the vicinity of the leak. The former location of AST T-2 is shown in the foreground. The former location of AST T-1 is on the right behind the buckets.

11. View of AST T-3, facing east.

12. View of AST T-3, facing northwest.

13. View underneath AST T-3.

14. AST T-3 being moved onto the ECI truck.

15. AST T-3 in place on the ECI truck.

16. Detail view of the piping under AST T-3.

17. View of the ground in the former location of AST T-3.

18. Excavations in the former locations of AST T-1 (left) and AST T-2 (right).

19. Excavation in the former location of AST T-3.

20. Excavation of former AST location T-4.

Owner Phone #:

**DESCRIPTION OF WORK: Remove three above ground tanks (T1=4,000gl,
T2=5,000gl, T3= 5,500gl)****IMPORTANT**

Application is hereby made to the City of Livermore for a permit subject to the conditions and restrictions set forth on the front face of this application. Each person upon whose behalf this application is made and each person at whose request and for whose benefit work is performed under or pursuant to any permit issued as a result of this application agrees to, and shall, indemnify and hold harmless the City of Livermore, its officers, agents and employees from any liability arising out of the issuance of any permit resulting from this application.

Licensed Contractor's Declaration:

I hereby affirm that I am licensed under provisions of Chapter 9, commencing with Section 7000 of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class: A ASB License Number: 720286

Expiration Date: 03/31/2008 Contractor's Signature: **Owner-Builder Declaration:**

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, California Business and Professions Code : Any city which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is a licensed contractor pursuant to the provisions of the Contractors' License Law (Chapter 9 [commencing with Section 7000] of Division 3 of the B & P Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violations of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00);

I, as a owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P. Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his/her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he/she did not build or improve for the purpose of sale.)

I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P. Code: The Contractor's License Law does not apply to an owner of property of contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).

I am exempt under Sec. 7044 B & P Code for this reason: Property Owner
 Issued Date: Owner Signature: 

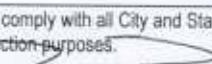

Worker's Compensation Declaration: I hereby affirm under penalty of perjury one of the following declarations:

I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: XL Specialty Insurance Co. Policy Number: RWD500005401

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Issued Date: Applicant: 

I certify that I have read this application and state that the above information is correct. I agree to comply with all City and State laws relating to the building construction, and hereby authorize representatives of this City to enter upon the above-mentioned property for inspection purposes.

Issued Date: 05-30-07 Signature of Owner or Contractor:

UNDERGROUND TANK CLOSURE CHECKLIST (ABOVE GROUND)

CITY OF Livermore Building Permit # DEMO7014

Business Name:

CALL MACH

Date: 5/31/07

Business Address:

461 McGraw Ave, Livermore

Tanks being removed: 3

Tank #1 Size: T-1, TANK TRAILER W/OUT WHEELS

Contents:

OIL/TAR... (?)

Tank #2 Size: T-2, OLD OUST TAST

Contents:

OIL/WATER... (?)

Tank #3 Size: T-3, TANK TRAILER W/OUT WHEELS

Contents:

OIL/TAR/FUEL... (?)

Tank #4 Size:

Contents:

1. Tank closure permit has been obtained and is on site. Yes No

2. Any changes from approved closure plan? NO

3. A 40 B:C fire extinguisher on site?

Yes No

4. A residual material removed from tank?

Yes No

If yes, have residuals been properly contained for off-site transport? Yes No

Name of Facility and location: PART AL: ASBURY ENVIRONMENTAL - CONDITION CUT MANIFEST # 002105111WK
 WATO AWISO ON-AWISO

5. Observed receipt for dry ice?

Yes No

Number of pounds of dry ice in each tank?	#1	#2	#3	#4
NYA	100+	100+		

6. Contractor has calibrated combustible gas detector *in presence of inspector?* Yes No

Comments: _____

7. Combustible gas readings/oxygen readings:

Take three measurements, one near the top, center and bottom of tank and report the findings:

Tank #	# of Dry Ice	% LEL (top)	% LEL (mid)	% LEL (bottom)	% O ₂ (top)	% O ₂ (mid)	% O ₂ (bottom)	OK to remove?
1	SCRAPPED/Pieces - IN YARD OFF BN (0) TO TIME PIPES...	—	—	—	—	—	—	<input checked="" type="checkbox"/> YES
2	0	0	0	0	5	30	2.6	<input checked="" type="checkbox"/> YES
3	0	0	0	0	4.5	5.0	5.0	<input checked="" type="checkbox"/> YES
4	—	—	—	—	—	—	—	—

Tank cannot be pulled if concentration of flammable vapors exceeds 20% of the LEL of the material in the tank or the oxygen concentration exceeds 5%.

8. After tank is removed, conditions of tank(s) and piping:

	Tank 1	Tank 2	Tank 3	Tank 4
Any corrosion or holes?	—	<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	—
Was the tank wrapped?	<input type="checkbox"/> NO	<input type="checkbox"/> NO	<input type="checkbox"/> NO	—
Any hydrocarbon vapors?	<input type="checkbox"/> NO	<input checked="" type="checkbox"/> YES	<input checked="" type="checkbox"/> YES	—
Any discoloration of the soil in the tank pit or along piping trench?	<input checked="" type="checkbox"/> YES	<input checked="" type="checkbox"/> YES	<input checked="" type="checkbox"/> YES	—

Composition of backfill and other observations: Ground Surface - Sandy

SOIL CLAY N/ROCKS - EXCAVATION NOT OBSERVED

9. Was there evidence of contamination which would trigger the 24-hour release reporting requirements? Yes No
If yes, was a blank copy provided to site operator? Yes No N/A - ABOVE GROUND TANKS

10. Has all obvious contamination been removed? Yes No

EXCAVATION AND SANDING TO BE CONDUCTED PER APPROVED ALAMEDA COUNTY
Describe details of approximately how much and where it will be disposed of?
ENVIRONMENTAL HEALTH WORKSHEET DATED 5/18/07 (and Amendments)

11. Is water observed in tank pit? Yes No If yes, a sample of the water must be taken.
Sample collected? SEE ABOVE (#10) Yes No

12. Soil samples must be collected in the tank pit under each end of the tank, a minimum of two feet into native soil.

Soil samples were collected according to the closure plan. Yes No

Soil samples were collected under piping at 20 ft. intervals and/or fittings. Yes No

Samples of the stockpile were taken to determine disposal options. Yes No
SEE ABOVE (#10)

13. The samples were properly taken? Yes No

The samples were properly sealed and labeled. Yes No

The chain of custody form was observed to be properly completed? Yes No

The samples were placed in an iced chest? Yes No

Name and location of analytical laboratory

SEE ABOVE (#10)

14. The tank pit must be filled with soil or properly barricaded to prevent unauthorized access.

Was the tank pit filled with: new soil excavated backfill **- OR -**

Was the tank pit left open pending analytical results? Yes No

Was the tank pit covered/barricaded? Yes No

- TO BE DETERMINED BY ALAMEDA COUNTY ENVIRONMENTAL HEALTH - NOTE, EXISTING FENCE SITE
15. Tanks loaded onto hauler vehicle have identifying numbers spray painted on them? Yes No
NOT OBSERVED

16. Hauler provides documentation of current certification as a hazardous waste hauler. Yes No

17. Manifest observed to be properly completed (name and address, EPA ID, hauler name, disposal site, signed and dated).

Name and address of disposal site: ECI - RICHMOND CA MANIFEST #'S: T1 002141319-JJK
T2 3 002141318-JJK

18. Were all containers, residual materials, tanks and associated piping transported off site and manifested? Yes No

Diagram of tank pit, sample locations and ID

All OTHERS - YES, SEE #4

SEE ATTACHED MAP

Personal on site:

- JENNIFER MORRIS, STAFF GEOLOGIST ENVIRONMENTAL INVESTIGATIONS SERVICES, INC.
- SEAN McCORMICK, OPERATIONS MANAGER MACOY RESOURCE CORPORATION

19. Tanks properly cleaned and certified if transported as non-hazardous waste? Yes No N/A

American Scientific Laboratories, LLC (ASL) accepts sample materials from clients for analysis with the assumption that all of the information provided to ASL verbally or in writing by our clients (and/or their agents), regarding samples being submitted to ASL, is complete and accurate. ASL accepts all samples subject to the following conditions:

- 1) ASL is not responsible for verifying any client-provided information regarding any samples submitted to the laboratory.
- 2) ASL is not responsible for any consequences resulting from any inaccuracies, omissions, or misrepresentations contained in client-provided information regarding samples submitted to the laboratory.
