Jennifer,

The correspondence is to inform you that Alameda County Department of Environmental Health (ACDEH) has denied the GeoTracker report submittal- confirmation #8895447015- as the report is incomplete. Please resubmit report with a revised date and a statement in the initial paragraph indicating the reason for the resubmittal. ACDEH requests the revised report include the associated laboratory analysis report, analysis summary tables, and field sheets documenting field activities.

Note that the associated EDF and GEO\_WELL submittals have not been received pending submittal of the revised report and do not currently require resubmittal.

ACDEH requests submittal of report Figure 4 and Figure 5 as the associated GEO\_MAP for the revised report.

Please perform the report submittal within the next month and provide me with an email indicating the revised report has been submitted.

ACDEH will be reviewing your request for completing the site investigation in the near future and will be providing a response.

Regards,  
Keith
