**RE: ADDENDUM TO QUARTERLY MONITORING REPORT
FORMER WESTERN STUCCO PRODUCTS
5115 EAST EIGHTH STREET, OAKLAND, CALIFORNIA
EBA Project No. 00-805 (31)**

Dear Mr. Chan:

As we discussed in our telephone conversation on this date, I am submitting this addendum to the June 6, 2001 Quarterly Monitoring Report for the above mentioned site. Please find attached the potentiometric surface map developed from water level measurements recorded during the May 3, 2001 sampling event. This map indicates a groundwater flow direction ranging from approximately N 35° W to N 86° E, with a gradient of 0.06 to 0.03 feet/feet respectively.

Potentiometric surface maps showing groundwater flow direction and gradient will be submitted for all subsequent monitoring events. Please call (707) 544-0784 if you have any further questions regarding this sampling event.

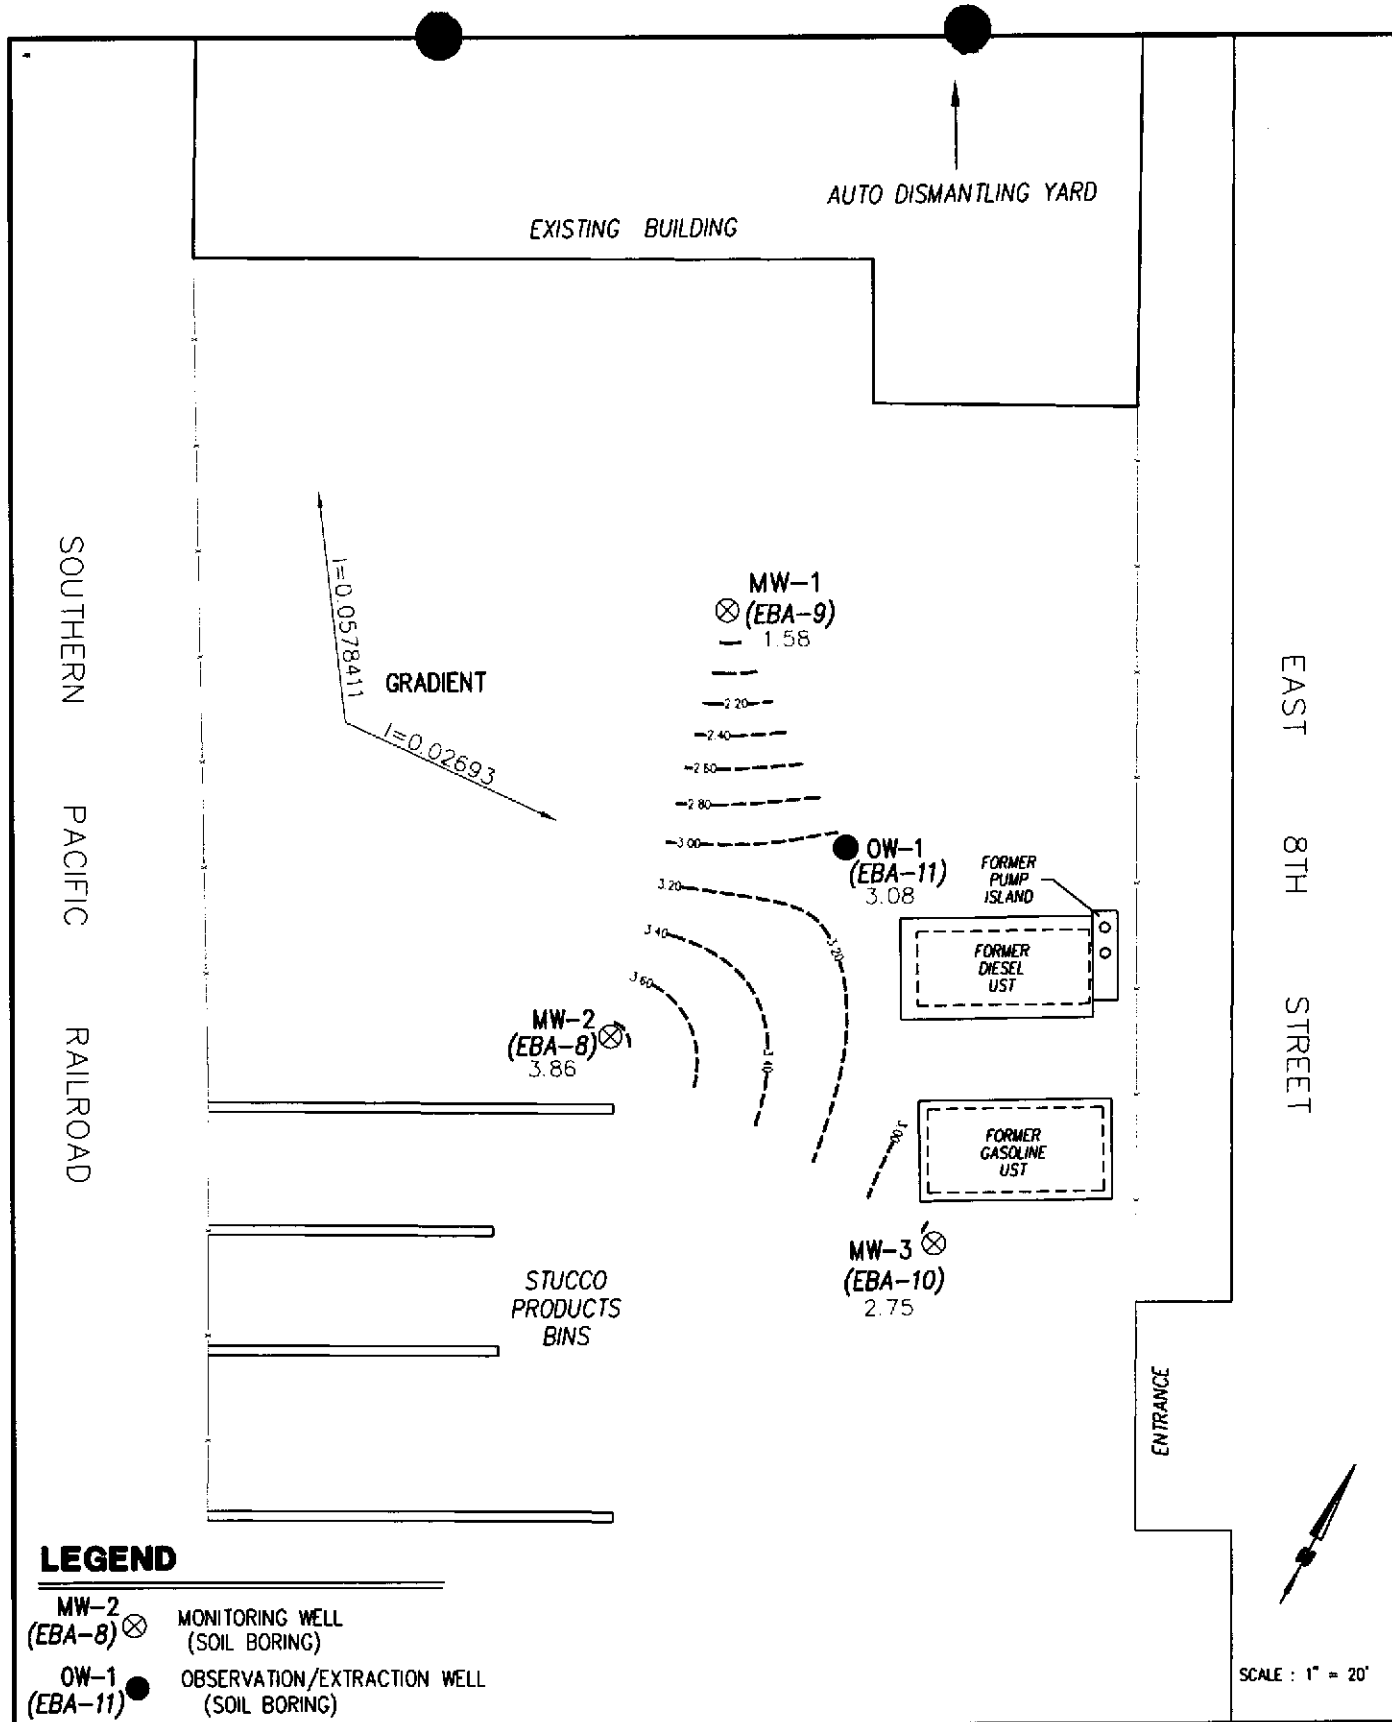

Sincerely,

Erik Phenix
Environmental Technician
