Received call from Mark Zeppetello, representing owner of site. At some point they have an interest in selling site, but have not heard from County in several years. If we are in agreement then fine, but if not they need to have county comment on recent recommendations. Let him know it has been on my radar, is on my “short” review list, but I keep getting diverted, most recently by large cluster of comingled plumes, with a good deal of work and data that takes time to understand. I’ll make a note of the call for the file and on my tracking sheet to push higher in the review process. He’ll likely write if nothing in a few months.
