Jake,

Thanks for the update. You can use this email as documentation of the extension request should it be needed. I've updated Geotracker already to reflect the Nov. 30th date.

Subject: Paco Pumps R000320

Mark,

Thanks for your call today. We appreciate the continued support and flexibility. We are in the process of completing the field work at the former Paco Pumps Site in San Leandro. We have had an access problem installing and sampling the sub-slab vapor points and one existing soil vapor probe. The current site occupant has indicated that we should be able to complete the investigation around October 24th. This means that we will not have analytical data back from the laboratory until some time in mid-November, and the report will take a few weeks to write and finalize.

Due to these issues, we would like to request an extension until November 30th, 2018 for the investigation report due date.

Thank you,

Jake
