Subject: Extension Approval for Paco Pumps (RO320)

Jake,

Per our telephone conversation just now, due to the coordination problems and laboratory reporting issues, I am in agreement that a two week extension would provide better data reporting for the recent investigation. I've already extended the due date to December 14, 2018 on Geotracker.

If I've not mentioned it before, please email me a copy of reports at the same time you notify me that they have been uploaded to Geotracker. There is a two to three day wait period on Geotracker before they are available, and it helps me track incoming reports on the site.

Thanks,

*Mark Detterman
