Gus and Manwel,

- 1) You have submitted plans to conduct soil vapor extraction at the site, which appears to be a viable remedial method.
- 2) As a County employee, I am not allowed to comment or advise on the selection or performance of environmental consultants.

Regards,  
Jerry Wickham

Jerry, I hope you are well. I have a few questions:

1. Do you feel that we are on the right track with everything. I desperately need the station to get clean so that we can unload it... it's a huge financial strain on us.
2. I also way approach by this guy who wants to take over the project and feels that they have a better track record and are more capable of fixing the problem fast rather than squeezing government funds. He claims they have done work with you: **Subu Thiagarajan, M.Appl.Sc., M.S.**  
**Stratus Environmental Inc.**

Anything you can tell me about them?

Thanks for your time.  
Gus and Manwel Shuwayhat

James,

We have no objection to the proposed analytes for the upcoming groundwater monitoring event.

Regards,  
Jerry Wickham

Jerry -

The purpose of this email is to document our phone conversation from earlier today. We discussed laboratory analyses of groundwater samples for the 160 Holmes site. Samples for this quarter will be tested for TPHg, BTEX, and MTBE only in order to reduce project costs.

Thank you  
James
