Subject: Fuel Leak Case No. RO0000327, Taxi Taxi, 2345 International Blvd., Oakland, CA

Dear Messrs. Wong:

Alameda County Environmental Health (ACEH) staff has reviewed the case file and the work plans entitled, "Site Assessment Work Plan," dated April 13, 2005, and "Feasibility Testing Work Plan," dated August 24, 2004 prepared for the above referenced site on your behalf by Cambria Environmental Technology, Inc. Separate phase hydrocarbons have been detected in all six wells located within your property. The lateral extent of off-site contamination has not been determined. The "Site Assessment Work Plan" proposes the replacement of three existing monitoring wells and the installation of six off-site monitoring wells. The "Feasibility Testing Work Plan" proposes remediation well installation, aquifer testing, a dual phase extraction (DPE) test, and a brief soil vapor extraction test prior to the DPE test. ACEH concurs with the work plans provided that the conditions identified in the technical comments below are met. We request that you address the following technical comments, perform the proposed work, and send us the reports described below. Please provide 72-hour advance written notification to this office (e-mail preferred to [jerry.wickham@acgov.org](mailto:jerry.wickham@acgov.org)) prior to the start of field activities.

#### TECHNICAL COMMENTS

- Well Screen Length.** ACEH concurs that existing wells screened across two water-bearing zones should be destroyed and replaced with shallower wells with more appropriate screen intervals. ACEH requests that the screen length for the reconstructed wells within the upper water-bearing zone be no greater than 10 feet rather than 15 feet as proposed. Therefore, the depths of the wells are to be decreased. The filter packs for the reconstructed wells are to be installed as proposed, approximately 6 inches above the top of the well screen. Please present the results in the Site Investigation Report requested below.
- Lower Water-bearing Zone.** In order to assess whether the lower water-bearing zone has been impacted and to assess vertical hydraulic gradients at the site, ACEH requests that a monitoring well be installed within the lower water-bearing zone at a location near well MW-1. Therefore, existing well MW-1 is to be overdrilled as proposed and replaced by a short screen monitoring well installed within the lower water-bearing zone and a shallower monitoring well installed within the upper water-bearing zone. As described in comment 1 above, the screen length for the shallower well in the upper water-bearing zone is to be no greater than 10 feet. The well installed within the lower water-bearing zone is to have a filter pack no greater than 5 feet in length. Please present the results in the Site Investigation Report requested below.

3. **Well MW-2.** Existing well MW-2 is to be overdrilled and reconstructed in addition to existing wells MW-1, MW-3, and TMW-4. The top of the well screen in well MW-2 is submerged which affects the ability of the well to detect and monitor free product at the site. In addition, since the well has a well screen length of approximately 23 feet, ambient vertical groundwater flow through the well and filter pack may affect static water levels and sample quality. Please present the results in the Site Investigation Report requested below.
4. **Aquifer Tests and Observation Wells.** The proposed constant rate aquifer test is not to be conducted until the existing monitoring wells have been reconstructed. ACEH requests that the reconstructed wells be used as observation wells during the constant rate aquifer test. Please present the results in the Feasibility Study Report requested below.

### **TECHNICAL REPORT REQUEST**

Please submit technical reports to Alameda County Environmental Health (Attention: Mr. Jerry Wickham), according to the following schedule:

- **August 30, 2005** - Quarterly Report for the Second Quarter 2005
- **November 20, 2005** – Site Investigation Report
- **November 30, 2005** - Quarterly Report for the Third Quarter 2005
- **January 20, 2006** – Feasibility Study Report and Corrective Action Plan
- **February 28, 2006** - Quarterly Report for the Fourth Quarter 2005

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

### **PERJURY STATEMENT**

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

### **PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS**

The California Business and Professions Code (Sections 6735, 6835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to

present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature, and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

**UNDERGROUND STORAGE TANK CLEANUP FUND**

Please note that delays in investigation, later reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

**AGENCY OVERSIGHT**

If it appears as though significant delays are occurring or reports are not submitted as requested, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.

If you have any questions, please call me at (510) 567-6791.

Sincerely,

Jerry Wickham, P.G.

Subject: Fuel Leak Case No. RO0000327, Taxi Taxi, 2345 International Blvd., Oakland, CA

Dear Messrs. Wong:

Alameda County Environmental Health (ACEH) staff has reviewed the case file for the above referenced site including the documents entitled, "Site Assessment Report," dated March 10, 2006 and "Groundwater Monitoring Report – Fourth Quarter 2005," dated February 16, 2006. Both reports were prepared on your behalf by Cambria Environmental Technology, Inc. The Site Assessment Report presents the results of a site assessment activities conducted at the site in the latter half of 2005. The site assessment activities consisted of reconstruction of several monitoring wells, installation of additional monitoring wells, installation of a remediation well, soil sampling from selected monitoring well borings, and groundwater sampling from new and existing monitoring wells. Sampling results from the site assessment confirm previous findings that soil and groundwater have been impacted from fuel releases at the site. The Site Assessment Report recommends continuation of the groundwater monitoring program.

ACEH previously requested that you complete feasibility testing as proposed in the document entitled, "Feasibility Testing Work Plan," dated August 24, 2004. In our July 20, 2005 correspondence, we requested that the results of the feasibility testing be presented in a Feasibility Study Report and Corrective Action Plan by January 20, 2006. To date, we have not received results from the feasibility testing. We request that you complete the feasibility testing and submit the feasibility testing results as soon as possible but **no later than June 27, 2006**.

We request that you address the following technical comments, perform the proposed work, and send us the reports described below.

**TECHNICAL COMMENTS**

1. **Hydraulic Gradient.** Local groundwater mounding appears to affect the hydraulic gradient for the site, which appears bifurcated and is not consistent with the regional hydraulic gradient. In order to help assess seasonal and local mounding effects on hydraulic gradient, we request that you measure water levels in all wells on a monthly or greater frequency for a period of three months beginning in April 2006. Please present the results, including Groundwater Elevation Contour Maps in the Feasibility Study Testing Report requested below.
2. **SPH Monitoring and Removal.** The "Groundwater Monitoring Report – Fourth Quarter 2005," dated February 16, 2006 indicates that if SPH is observed during the first quarter 2006 monitoring event, twice per month SPH removal events will be implemented. ACEH

concur with this approach. Please present the tabulated results of SPH removal in the quarterly monitoring reports requested below.

3. **Feasibility Testing.** The "Feasibility Testing Work Plan," dated August 24, 2004 proposed aquifer testing, a dual phase extraction (DPE) test, and a brief soil vapor extraction test prior to the DPE test. We request that you submit the results from the feasibility testing in the Feasibility Testing Report requested below.
4. **Quarterly Groundwater Monitoring.** Quarterly groundwater monitoring is to be continued for the site. Based on the detection of MTBE in well MW-12, please analyze future groundwater samples from wells MW-12, MW-11, and MW-3A for the fuel oxygenates ETBE, DIPE, TAME, and TBA by EPA Method 8260B in addition to the analyses currently performed. Please present the results in the quarterly monitoring reports requested below.

#### **TECHNICAL REPORT REQUEST**

Please submit technical reports to Alameda County Environmental Health (Attention: Jerry Wickham), according to the following schedule:

- **May 30, 2006** - Quarterly Monitoring Report for the First Quarter 2006
- **June 27, 2006** – Feasibility Testing Report
- **August 30, 2006** - Quarterly Monitoring Report for the Second Quarter 2006

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

#### **ELECTRONIC SUBMITTAL OF REPORTS**

Effective **January 31, 2006**, the Alameda County Environmental Cleanup Oversight Programs (LOP and SLIC) require submission of all reports in electronic form to the county's ftp site. Paper copies of reports will no longer be accepted. The electronic copy replaces the paper copy and will be used for all public information requests, regulatory review, and compliance/enforcement activities. Instructions for submission of electronic documents to the Alameda County Environmental Cleanup Oversight Program ftp site are provided on the attached "Electronic Report Upload (ftp) Instructions." Please do not submit reports as attachments to electronic mail.

Submission of reports to the Alameda County ftp site is an addition to existing requirements for electronic submittal of information to the State Water Resources Control Board (SWRCB) Geotracker website. Submission of reports to the Geotracker website does not fulfill the requirement to submit documents to the Alameda County ftp site. In September 2004, the SWRCB adopted regulations that require electronic submittal of information for groundwater cleanup programs. For several years, responsible parties for cleanup of leaks from underground storage tanks (USTs) have been required to submit groundwater analytical data, surveyed locations of monitor wells, and other data to the Geotracker database over the Internet. Beginning July 1, 2005, electronic submittal of a complete copy of all necessary reports was

required in Geotracker (in PDF format). Please visit the SWRCB website for more information on these requirements ([http://www.swrcb.ca.gov/ust/cleanup/electronic\\_reporting](http://www.swrcb.ca.gov/ust/cleanup/electronic_reporting)).

In order to facilitate electronic correspondence, we request that you provide up to date electronic mail addresses for all responsible and interested parties. Please provide current electronic mail addresses and notify us of future changes to electronic mail addresses by sending an electronic mail message to me at [jerry.wickham@acgov.org](mailto:jerry.wickham@acgov.org).

#### PERJURY STATEMENT

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

#### PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS

The California Business and Professions Code (Sections 6735, 6835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature, and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

#### UNDERGROUND STORAGE TANK CLEANUP FUND

Please note that delays in investigation, later reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

#### AGENCY OVERSIGHT

If it appears as though significant delays are occurring or reports are not submitted as requested, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.

**Test name:** RW-1 MPE Test

**Analysis method:** Theis

<b>Analysis results:</b>	Transmissivity: 3.22E-2 [cm <sup>2</sup> /s]	Conductivity: 4.23E-5 [cm/s]
	Storativity: 1.97E-4	

<b>Test parameters:</b>	Pumping well: RW-1	Aquifer thickness: 25 [ft]
	Screen radius: 0 [m]	Confined aquifer
	Screen length: 15 [m]	
	Casing radius: 0.1667 [m]	
	Discharge rate: 0.43201474 [U.S.]	

**Comments:** Groundwater depth data collected in well MW-1A during groundwater extraction from well RW-1 used for analysis.

Dear Matt:

Enclosed are:

- 1). the results of 1 analyzed sample from your #513-1000; Wong project,
- 2). a QC report for the above sample
- 3). a copy of the chain of custody, and
- 4). a bill for analytical services.

All analyses were completed satisfactorily and all QC samples were found to be within our control limits.

If you have any questions please contact me. McC Campbell Analytical Laboratories strives for excellence in quality, service and cost. Thank you for your business and I look forward to working with you again.

Yours truly,

Angela Rydelius, Lab Manager

Dear Matt:

Enclosed are:

- 1). the results of 1 analyzed sample from your #513-1000; Wong project,
- 2). a QC report for the above sample
- 3). a copy of the chain of custody, and
- 4). a bill for analytical services.

All analyses were completed satisfactorily and all QC samples were found to be within our control limits.

If you have any questions please contact me. McC Campbell Analytical Laboratories strives for excellence in quality, service and cost. Thank you for your business and I look forward to working with you again.

Yours truly,

MS = Matrix Spike; MSD = Matrix Spike Duplicate; LCS = Laboratory Control Sample; LCSD = Laboratory Control Sample Duplicate; RPD = Relative Percent Deviation.

% Recovery = 100 \* (MS-Sample) / (Amount Spiked); RPD = 100 \* (MS - MSD) / ((MS + MSD) / 2).

MS / MSD spike recoveries and / or %RPD may fall outside of laboratory acceptance criteria due to one or more of the following reasons: a) the sample is inhomogenous AND contains significant concentrations of analyte relative to the amount spiked, or b) the spiked sample's matrix interferes with the spike recovery.

£ TPH(btex) = sum of BTEX areas from the FID.

# cluttered chromatogram; sample peak coelutes with surrogate peak.

N/A = not enough sample to perform matrix spike and matrix spike duplicate.

NR = analyte concentration in sample exceeds spike amount for soil matrix or exceeds 2x spike amount for water matrix or sample diluted due to high matrix or analyte content.

Dear Matt:

Enclosed are:

- 1). the results of 1 analyzed sample from your #513-1000-40; Wong project,
- 2). a QC report for the above sample
- 3). a copy of the chain of custody, and
- 4). a bill for analytical services.

All analyses were completed satisfactorily and all QC samples were found to be within our control limits.

If you have any questions please contact me. McC Campbell Analytical Laboratories strives for excellence in quality, service and cost. Thank you for your business and I look forward to working with you again.

Yours truly,

Angela Rydelius, Lab Manager

# cluttered chromatogram; sample peak coelutes with surrogate peak.

+The following descriptions of the TPH chromatogram are cursory in nature and McC Campbell Analytical is not responsible for their interpretation: a) unmodified or weakly modified gasoline is significant; b) heavier gasoline range compounds are significant(aged gasoline?); c) lighter gasoline range compounds (the most mobile fraction) are significant; d) gasoline range compounds having broad chromatographic peaks are significant; biologically altered gasoline?; e) TPH pattern that does not appear to be derived from gasoline (stoddard solvent / mineral spirit?); f) one to a few isolated non-target peaks present; g) strongly aged gasoline or diesel range compounds are significant; h) lighter than water immiscible sheen/product is present; i) liquid sample that contains greater than ~1 vol. % sediment; j) reporting limit raised due to high MTBE content; k) TPH pattern that does not appear to be derived from gasoline (aviation gas). m) no recognizable pattern; n) TPH(g) range non-target isolated peaks subtracted out of the TPH(g) concentration at the client's request.
