Subject: RE: RO 337 - California Linen Case Closure - Request for Confirmation

The document you forwarded was a RACC for the petroleum release at the site. The petroleum release case has been closed in Geotracker per state requirements.

At some point I will need to revisit the fill soil metals issue, as that was not included in the closure, as it is not associated with the petroleum release. I should be able to use the existing case number to handle the hopefully limited response for awhile. (Basically, the petroleum case has now been separated from a fill soil metal case per the state's preference).

Subject: RO 337 - California Linen Case Closure - Request for Confirmation

Hi Mark,

I just spoke with Don Miller, and we would like to confirm in writing that based on the attached November 18, 2013 letter from the SWRCB that no further letters will be forthcoming from the County to California Linen and that no further documentation is required by the County from California Linen for activities related to the work described in the SWRCB November 18, 2013 letter. It is our understanding that the attached SWRCB November 18, 2013 letter is a No Further Action letter.

Please let me know at your earliest convenience. Thank you!

Paul
