Oakland, California

*Consider TPH-d w/ silica gel cleanup
next sampling event since MW-6
is near later nowatt*

Dear Ms. Chu:

Enclosed is the First Quarter Groundwater Monitoring Report for 1999, prepared by our consultant Blaine Tech Services, Inc. for the above noted site. The groundwater samples were analyzed for the presence of TPH-g, TPH-d, BTEX and MtBE constituents. Monitoring wells MW-5 and MW-6 are sampled semi-annually (1st and 3rd quarters), while wells MW-7 and MW-8 are sampled annually (1st quarter). The remaining four wells are sampled quarterly. All wells are measured for groundwater depth.

Monitoring well MW-1 showed a decline in the benzene constituent from the previous sampling event, while it increased in wells MW-3 and MW-4. A small amount of separate phase hydrocarbon (0.05 feet) was detected in monitoring well MW-2 with 0.200 gals of hydrocarbons removed. Wells MW-5 and MW-8 were below method detection limits for the BTEX and TPH-g constituents while well MW-6 was below method detection limits for the TPH-g and MtBE constituents and well MW-7 was below method detection limits for TPH-g, BTEX and MtBE constituents.

The chromatogram pattern for the TPH-d constituent detected in wells MW-1, MW-3 MW-4 and MW-6 indicated an unidentified hydrocarbon. TPH-d was detected in wells MW-5, MW-7 and MW-8.

Depth to groundwater varied from 1.75 feet to 13.75 feet below grade with a direction of flow varying southwesterly.

April 29, 1999
Ms. Eva Chu
Chevron Service Station #9-0121
Page 2

A Work Plan was submitted and approved to replace the existing $\frac{3}{4}$ inch diameter monitoring wells, MW-2, MW-3 and MW-4 with 2-inch diameter wells and to install an additional downgradient well. The wells were installed on April 2, 1999, and I would expect to receive the well installation report within the next two to three weeks.

Chevron will continue to monitor the wells in the sampling frequency as noted above. If you have any questions or comments, please call me at (925) 842-9136.

Sincerely,
CHEVRON PRODUCTS COMPANY

Philip R. Briggs
Site Assessment and Remediation Project Manager

First Quarter 1999 Groundwater Monitoring at
Chevron Service Station Number 9-0121
3026 Lakeshore Avenue
Oakland, CA

Monitoring Performed on March 4, 1999

Groundwater Sampling Report 990304-T-1

This report covers the routine monitoring of groundwater wells at this Chevron facility. Blaine Tech Services, Inc.'s work at the site includes inspection, gauging, evacuation, purgewater containment, sample collection and sample handling in accordance with standard procedures that conform to Regional Water Quality Control Board requirements.

Routine field data collection includes depth to water, total well depth, thickness of any separate immiscible layer, water column volume, calculated volume of a three-case volume purge, elapsed evacuation time, total volume of water removed, and standard water parameter instrument readings. Sample material is collected, contained, stored, and transported to the laboratory in conformance with EPA standards. Purge water is, likewise, collected and transported to McKittrick Waste Treatment Site for disposal.

Basic field information is presented alongside analytical values excerpted from the laboratory report in the cumulative table of **WELL DATA AND ANALYTICAL RESULTS**. The full analytical report for the most recent samples is located in the **Analytical Appendix**. The table also contains new groundwater elevation calculations taken from the computer plotted gradient

map which is located in the **Professional Engineering Appendix**.

At a minimum, Blaine Tech Services, Inc. field personnel are certified upon completion of a forty-hour Hazardous Materials and Emergency Response training course per 29 CFR 1910.120. Field personnel are also enrolled in annual eight hour refresher courses.

Blaine Tech Services, Inc. conducts sampling and documentation assignments of this type as an independent third party. In order to avoid compromising the objectivity necessary for the proper and disinterested performance of this work, Blaine Tech Services, Inc. concentrates on objective data collection and does not participate in the interpretation of analytical results, the definition of geological or hydrological conditions, the formulation of recommendations, or the marketing of remedial systems.

Please call if you have any questions.

Yours truly,

Christine Lillie
Project Coordinator

RE: Chevron/P903266

Dear Christine Lillie

Enclosed are the results of analyses for sample(s) received by the laboratory on March 8, 1999. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Scott Forbes
Project Manager

Notes and Definitions

#	Note
1	Sample chromatographic pattern does not resemble the fuel standard used for quantitation.
2	Results in the diesel organics range are primarily due to overlap from a gasoline range product.
3	The surrogate recovery for this sample cannot be accurately quantified due to interference from coeluting organic compounds present in the sample extract.
4	Hydrocarbon pattern present in the requested fuel quantitation range but does not resemble the pattern of the requested fuel.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
Recov.	Recovery
RPD	Relative Percent Difference
