Re: Former Shell Service Station
461 Eighth Street
Oakland, California
WIC #204-5508-6200

Ms. Eberle:

This letter is to confirm our telephone conversation of Wednesday, April 14, 1993, regarding the removal of floating product from monitoring wells S-5 and S-6, at the above referenced site. As discussed in the enclosed letter from the Shell sampling contractor (Blaine Tech Services), the wells were not accessible during two separate field visits in the first quarter of 1993. Wells S-5 and S-6 were covered by construction debris from the renovation of the adjacent buildings, and a chain-link fence with no gate had been placed around the lot that contains wells S-4.

Monitoring and sampling for the second quarter of 1993 is scheduled for the week of May 5, 1993. A GSI site visit on the afternoon of April 14 revealed that construction debris have been removed from wells S-5 and S-6. GSI will check the site again prior to sampling, to insure that the wells are accessible and GSI will pursue access to Well S-4. GSI will issue the second Quarterly Monitoring and Sampling Report upon receipt of field data. In addition, GSI is preparing a Work Plan to further assess conditions at this site. This Work Plan should be completed by May 7, 1993.

Re: 1Q93 groundwater monitoring, Shell Oil Company, 461 8th Street, Oakland,
California.

Dear Ellen,

As previously discussed, with both yourself and Michael Carey, 1Q93 groundwater monitoring was not conducted at the Shell Oil Company site located at 461 8th Street in Oakland, Ca. due the inaccessibility of all three groundwater monitoring wells.

The site was visited by Blaine Tech Services, Inc. personnel on both February 23, 1993 and March 10, 1993. On both occasions access to wells S-4, S-5 and S-6 was made impossible by the presence of construction materials, and, in the case of well S-4, an impenetrable fence topped with barbed wire.

Please feel free to call with any questions or if I can be of further assistance.

Sincerely,

C. Glen Bennett
Senior Project Manager

Ms. Eberle:

Enclosed is a copy of the historical ground water monitoring data for the above referenced site. The data includes water and floating product levels taken between June 1986 and December 1992.

Please note that DTW stands for depth to water, and DTH is depth to hydrocarbon. Also, note that (1.00) refers to a trace of floating product.

If you have any questions, please call.

Sincerely,

A handwritten signature in cursive script that reads "Edy J. Milliken".
