End: Tue 11/25/2008 11:45 AM
Duration: 0 hours

Phone call with Denis Brown of Shell. First injection event delayed until December 18. Still some concern regarding ACEH not allowing development at site. I referred back to previous position from two meetings on subject that ACEH would agree to development once it was determined that final remedial design was compatible with the development. Denis indicated that chemical oxidation was their remedial plan. Once it has been determined that chemical oxidation is effective and will be the final site remedy then we should review the issue of site development. Shell will be submitting a second work plan to address off-site groundwater.
