**Re: Sensitive Receptor Report**  
Delta Project No. C105760051  
76 Service Station No. 5760  
376 Lewelling Boulevard  
San Lorenzo, California

Dear Mr. Hwang:

This report has been prepared by Delta Environmental Consultants, Inc. (Delta) on behalf of ConocoPhillips Company (COP) to present the results of the sensitive receptor survey for the above referenced site. Figure 1 shows the location and vicinity of the site. The purpose of the survey was to (1) conduct a one mile radius water well search using the Department of Water Resources (DWR) database, and (2) generate a list of property owners within a 1,000 foot radius of the site and determine by the means of a questionnaire if any have the potential of a sensitive receptor. Figure 2 shows site facility details and locations of the soil borings.

#### **BACKGROUND**

The underground storage tanks (USTs) were removed and replaced in November 1987. At that time monitoring well U-1 was installed in response to the contamination observed during the UST replacement. Information on the installation of well U-1 is documented in a report *Well Installation* prepared by Woodward-Clyde Consultants dated March 25, 1988.

Three additional monitoring wells (U-2, U-3 and U-4) were installed in August 1990 by GeoStrategies Incorporated (GSI). The installation of these wells is documented in a report *Monitoring Well Installation Report* prepared by GSI dated November 16, 1990.

In March 1992 GSI installed four offsite monitoring wells (U-5 through U-8) to further delineate the groundwater hydrocarbon plume. The installation of these wells is documented in a report *Well Installation Report* prepared by GSI dated June 15, 1992.

A member of:

An additional offsite well, U-9, was installed by GSI in May 1993. The installation of this well is documented in a report *Well Installation Report* prepared by GSI dated August 9, 1993

In September 1993, twelve borings were drilled as part of a property divestment program. Due to hydrocarbon impacted soils being encountered, three of the borings were converted to vapor extraction wells.

In March 1994, the delineation of hydrocarbon-impacted soils was completed with the installation of two additional soil borings.

Between August 8 and 13, 1994, a soil vapor extraction (SVE) feasibility test was conducted by Pacific Environmental Group (PEG). The results of the test showed SVE to be an applicable technology for removal of petroleum hydrocarbons from soil and groundwater below at site.

In September 1995 a combination SVE and groundwater treatment (GWT) system was constructed at the site. Start-up activities for the GWT system began on October 3, 1995. SVE system start-up and continuous GWT operation began in mid-October 1995. The system continued to operate until February 1997 when it was shut down due to diminishing incremental benefit.

#### **REMEDIAL ACTIVITIES**

In September 1995 a combination SVE and groundwater treatment (GWT) system was constructed at the site. Start-up activities for the GWT system began on October 3, 1995. SVE system start-up and continuous GWT operation began in mid-October 1995. The system continued to operate until February 1997 when it was shut down due to diminishing incremental benefit.

#### **SENSITIVE RECEPTOR SURVEY**

Delta personnel reviewed the public records of the Alameda County Assessors office to obtain a list of parcel numbers, property owner's names, and addresses of properties within a 1,000-foot radius of the site. A Public Health Assessment Questionnaire (Questionnaire) presenting specific queries regarding the presence of sensitive receptors was mailed to each property owner. A copy of the Questionnaire is shown in Attachment A. One Hundred Sixty Four questionnaires were mailed on April 25, 2006. Delta received thirteen responses. Four of the surveys were returned by the post office due to invalid addresses.

A well is not present on any of the eight respondent properties and none of the properties have sumps.

A list of the parcel numbers, property owner's names and addresses with the responses to the returned questionnaire is presented in Table 1.

Delta also reviewed the public records of the Department of Water Resources to obtain a list of parcel numbers, property owner's names, and addresses of potential receptors within a one-mile radius of the site. Questionnaires were mailed to addresses on June 1, 2006. None of the questionnaires were returned to Delta.

A list of the property owner's names, well numbers and addresses is shown in Table 2.

Based on the U.S. Geological Survey Topographic Map for this area (San Leandro quadrangle, 1980), the nearest surface water body is San Lorenzo Creek located approximately 500 feet southeast to southwest of the site.

Delta personnel searched for nearby schools, daycare centers, and hospitals within the 1,000-foot radius of the site. No hospitals, daycare centers or schools were identified within the search radius during Delta's search.

#### REMARKS

The recommendations contained in this letter/report represent Delta's professional opinions based upon the currently available information and are arrived at in accordance with currently acceptable professional standards. This letter/report is based upon a specific scope of work requested by the client. The Contract between Delta and its client outlines the scope of work, and only those tasks specifically authorized by that contract or outlined in this report were performed. This letter/report is intended only for the use of Delta's Client and anyone else specifically listed on this letter/report. Delta will not and cannot be liable for unauthorized reliance by any other third party. Other than as contained in this paragraph, Delta makes no express or implied warranty as to the contents of this letter/report.

If you have any questions regarding this project, please contact Daniel Davis at (916) 503-1260.

Sincerely,  
Delta Environmental Consultants, Inc.

Ben Wright  
Staff Geologist

## PUBLIC HEALTH ASSESSMENT

April 25, 2006

**SUBJECT: POTENTIAL FUEL CONTAMINATION IN THE VICINITY OF 376 LEWELLING BOULEVARD, SAN LORENZO, CALIFORNIA**

To Whom it May Concern:

Alameda County Health Agency (ACHA) staff has requested a list of receptors that could potentially be affected by fuel released from a service station located at the intersection of Albion Avenue and East Lewelling Boulevard in San Lorenzo. The attached map shows the location of the service station in relation to your property. Please provide the information requested below in the space provided so we can demonstrate to the ACHA you have been contacted. Please complete only Section A if you do not have a well, basement, or a groundwater pumping system. It is permissible to write "unknown" if you simply do not know.

The results of this assessment will be used to determine if the water in your well or sump or air beneath/within your basement should be tested for the presence of fuel compounds. The testing would be free of charge and performed at your convenience. You will also receive a copy of the laboratory testing report. Please contact Ben Wright of Delta Environmental Consultants, Inc. (916-503-1263) or Don Hwang of the ACHA (510-567-6746) if you have questions or concerns regarding this questionnaire.

### **SECTION A**

Name of property owner: \_\_\_\_\_

Owner address: \_\_\_\_\_

Owner telephone number (if a well, basement, or sump is present): \_\_\_\_\_

Name of tenant at property (if not owner occupied): \_\_\_\_\_

Is the property used for commercial or residential purposes? \_\_\_\_\_

Is the property occupied by a multi-family complex (e.g., apartment building)? \_\_\_\_\_

Is there a well on the property? \_\_\_\_\_

Is there a basement on the property? \_\_\_\_\_

Is there a sump on the property? \_\_\_\_\_

continued on next page

**SECTION B (complete if a well exists at the subject site)**

Number of Wells: \_\_\_\_\_ Well Diameter(s): \_\_\_\_\_

Well Depth(s): \_\_\_\_\_

Pump Depth(s): \_\_\_\_\_

Material used for the well casing: \_\_\_\_\_

Date(s) the well(s) were installed: \_\_\_\_\_

How frequently are the well(s) used? \_\_\_\_\_

Approximate gallons of water pumped during each well cycle: \_\_\_\_\_

What is the well water used for? \_\_\_\_\_

**SECTION C (complete if you have a sump)**

Frequency of Use: \_\_\_\_\_

Approximate gallons of water pumped from the sump each day: \_\_\_\_\_

Where is the sump water discharged? \_\_\_\_\_

Please return this questionnaire in the enclosed self-addressed stamped envelope as soon as possible. A second questionnaire will be mailed to your attention if we do not receive a response within two weeks. Again, please participate for your protection. We welcome any comments you may have on the bottom of this page.

Sincerely,

Delta Environmental Consultants, Inc.
