**Duration:** 0 hours

Phone call with Roger Levin of Valero and Ken Mateik and Gary Barker of Horizon Environmental. They have been unable to find a location for a permanent treatment compound. The site is too small and there is no adjacent areas beyond the buildings. They tried to get a space for a treatment compound on the site to the south but the landowner indicates there may be a development planned and would not agree to construction of a treatment compound. Therefore, they will move ahead with mobile batch extractions as the remedial alternative in a SCM/CAP. They would like to do the first event in the fall. I indicated that there would need to be a public notification done for the site. The SCM/CAP will be submitted in early August; they will send me an email requesting an extension.
