I received a call from Tom Venus and Robert Miller. They called to inform ACEH that there have been delays in obtaining a power drop at the site for the remediation system. Stratus had been working with a PG&E representative and that person has left and the process has been restarted with a new PG&E representative. Tom and Robert also informed ACEH that the existing gas station tenant Connoco Phillips will terminate their lease with the property owner and demolish the station. Tom and Robert stated that BP does not want to invest money in the system simply to remove it a few months later. I told Tom and Robert that ACEH does not wish to hinder construction on the site, simply that the proposed demolition and new construction, if any, must allow for site cleanup to continue.
