Joanne,

The other option is for you to hire an environmental consulting firm to conduct testing specifically for your property.

Thank you for the explanation. I understand. However because I am on a downhill slope from the cleaners I will never rest easy until I know for sure. Is there any way to have testing done?

Thank

You.

Joanne

Hello Joanne,

I have reviewed the location of your property in relation to our existing sampling results. Your property is outside the area where contamination from Snow Cleaners has been detected. The area of potential effects that is being investigated is approximately 190 feet from your property. Given these facts, we do not believe there is a need to conduct sampling at your property or in the area of your property.

The radius of 300 feet for distributing the fact sheet goes beyond the area directly affected by the contamination for public participation purposes. I hope this explanation helps, please call me with any questions.

Regards,

Jerry Wickham

Subject: Snow Cleaners

Hello

Jerry,

I am a resident living within the 300 foot radius of the Snow Cleaners, (SLIC Case # RO0000357). I reside at 2654-34th Ave. I am very concerned about possible health effects of exposure to Stoddard solvent, PCA and VOCs as I have lived here since 1980 and raised my two children here. I would like to have the soil, soil vapor and groundwater of my yard tested. How can that be arranged? . My ph # is 510-535-1876.

Thank

You.

Joanne Jasson
