**Subject:** Fuel Leak Case RO358 and GeoTracker Global ID T0600101354- Exxon #7-0235, 2225 Telegraph Ave., Oakland

Dear Mr. Perkins,

In response to your correspondence below, I have reviewed the previous three semiannual groundwater monitoring events for the subject case and have observed that Plate 3 of these reports do not appear to be the same. Please include the groundwater contour map for the recent groundwater monitoring events as the GEO\_MAP associated with each of the respective reports by the date specified below. Alameda County Environmental Health (ACEH) requests the groundwater contour map be included in the electronic submittal of information to GeoTracker for future groundwater monitoring event submittals.

Additionally, please include the ACEH case file number in the subject line of future communications.

Please upload technical reports to the State Water Resources Control Board's Geotracker website, in accordance with the following schedule:

- **December 16, 2015 – Electronic Submittal of Information (GEO\_MAPs)**

Thank you for your cooperation. ACEH looks forward to working with you to advance the case toward closure. Should you have any questions regarding this correspondence or your case, please call me at (510) 567-6764 or send an electronic mail message at [keith.nowell@acgov.org](mailto:keith.nowell@acgov.org).

Regards,  
Keith Nowell

**Subject:** Geo Report denial T0600101354

Mr. Nowell,

I have recently been assigned project manager duties for this site and see that our recent geo report submittal was denied until a geo map is uploaded. Our groundwater reports do not generally contain a site map unless new wells or changes to the site have occurred. Reports include a site vicinity map, GW concentration map and GW gradient map. No changes have been made since the last Geo Map was uploaded in 2013.

Please confirm that you are requesting the same 2013 site map to be uploaded again.

Thank you for your time.

Regards,

**Scott Perkins**
