**Subject:** RO359, Dave's Station Remediation and CUF  
**Entry Type:** Phone call  
**Company:** Fugro

**Start:** Thu 3/1/2012 9:30 AM  
**End:** Thu 3/1/2012 9:50 AM  
**Duration:** 20 minutes

Discuss CAP with Jerriann Alexander. She says that DPE was not evaluated because the Valero did not have success with it, and that they do not expect a lot of water to collect in the shallow excavations for the site so preparing costs for treating and sending water to the POTW will not save money due to the low amount of water expected. (During excavation of the USTs not a lot of water accumulated at that time.) I still want another remedial option that is not excavation and addition of ORC. She informs me that her client will not pay for a CAP addendum and asks if I bring up these issues with Donna.
