I have a client who is considering purchasing a property at 21 Cali Court, Pleasanton, which backs up to the Alameda Country Transportation Corridor. We just found out that this site is affected by leaking fuel tanks and has not been cleaned up.

Your letter to William Borgh dated July 30, 2008 requests him to submit either a Pilot Test Work Plan or Draft Corrective Action Plan by September 29, 2008. I'd like to find out if this has been done.

I'd also like to know if you have a proposed date for cleanup, and if you can tell us how far reaching the cleanup would be. Would it extend into the yards of the properties on Cali Court? How long would it take to accomplish the cleanup?

Any information you can give us would be most appreciated. I will call you tomorrow to discuss this issue.

Thank you in advance,

Diane Sass, GRI CRS
