Phone call with David Byron of Gettler-Ryan. There is a potential for tank upgrade with new tanks being moved from southwest to northeast portion of site. I indicated that contaminated soil would likely be encountered in old tank pit. Provided that the soil from new tank excavation was sampled and shown to be acceptable, I would not have a problem with using soil from new tank pit to fill old tank pit. However, I would like to see excavation in the old tank pit expanded where necessary to remove contamination where feasible.
