**Entry Type:** Phone call  
**Start:** Tue 12/29/2009 3:19 PM  
**End:** Tue 12/29/2009 3:19 PM  
**Duration:** 0 hours

Phone call with Frank Beck of EBI Consulting 425-280-1787. He is performing a Phase I Assessment for a property on Las Positas; site is across Hopyard from Shell site at 3790 Hopyard. He asked whether contamination could be reaching the site he is evaluating. He has reviewed groundwater monitoring data.

- It is possible that plume extends to property he is evaluating.
- His property does not have a water supply well; therefore, does not appear to be a concern regarding exposure.
- Our agency would not require a property owner to remediate contamination coming on to their site from another source.
- Drinking water standard is 13 ppb; detection in well in street is 17 ppb.
- I indicated that I could not consider extreme hypothetical conditions. Current impact to off-site property he is reviewing appears minimal. May not be able to have a shallow water supply well.
