**Re: Site Closure Addendum for Matheson Trucking, 2500 Poplar St.,
Oakland, CA 94607
LOP Case No: 1306**

Dear Mr. Larry Seto:

New information has surfaced with regard to the tank removal soil stockpile at Matheson Trucking, 2500 Poplar Street in Oakland. In the closure form dated December 2, 1997, I stated that the stockpile has been aerating on-site since the tank removal. After a thorough investigation it has been determined that the above statement was incorrect. The stockpile was sampled on March 28, 1996. Laboratory analysis did not detect TPH-Gasoline, TPH-Diesel, and BTEX. The results were faxed to Jennifer Eberle on April 5, 1996. Then sometime between April 5 and May

17, 1996, the soil was removed from the site and the hole was backfilled with aggregate base rock. The final destination of the stockpile is believed to be BFI Vasco Road Sanitary Landfill in Livermore, however invoices are not available. Enclosed with this letter is verification for the change in the closure form and a revised table of soil sampling results.

I apologize for the incorrect information and hope that this new information clarifies the stockpile disposal issues. If you require any further assistance or have any questions, please contact me at (510) 620-0891.

Very truly yours,
Hageman-Aguiar, Inc.

Reneé L. Athey
Staff Engineer

Enclosures

4-13-98
1) What is date of the report that Table 3 should replace, Dec. 16
2) Need written statement from Matheson ID when soil went.
