Subject: FW: Public Comment Period Results and Request for Monitoring Well Destruction (RO370: Haber Oil Products; 1401 Grand Avenue, San Leandro)
Attachments: DIR_L_2013-11-12.pdf

Scott,

I realized that I should provide you with a timeline that will be used to track progress at the site. In order to progress the site towards closure, please use the following Technical Report Request. As you mentioned, funds will be requested from the state for this work to proceed. Extensions can be provided if the state has not responded, or the response date will not allow the work to be completed, by the date listed below. However, please be aware, that documentation that the funds request was submitted to the state, will be required by ACEH for the extension.

TECHNICAL REPORT REQUEST

Please upload technical reports to the ACEH ftp site (Attention: Mark Detterman), and to the State Water Resources Control Board's Geotracker website, in accordance with the specified file naming convention below, according to the following schedule:

- **March 3, 2014** – Well Destruction Report
File to be named RO370_WELL_DCM_R_yyyy-mm-dd

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

Online case files are available for review at the following website: <http://www.acgov.org/aceh/index.htm>.

Should you have questions, please let me know.

Subject: Public Comment Period Results and Request for Monitoring Well Destruction (RO370: Haber Oil Products; 1401 Grand Avenue, San Leandro)

Scott,

I received your voice mail this afternoon and wanted to respond to your inquiry as to the status of the public comment period for closure of the site. There were no comments received during the 60-day public comment period. You are therefore cleared to proceed with the destruction of all wells associated with the site (groundwater, vapor, etc), as requested in the November 12, 2013 letter from ACEH (copy attached).

The destruction of the wells does not need to be as closely choreographed as the letter indicates. The SWRCB has since clarified it's position for ACEH. Please obtain well destruction permits from ACPWA, let me know the date of the work, and submit a brief letter report with a professional stamp (and perjury statement) describing the work, including documentation of the disposal of all remaining waste generated at the site.

Should you have further questions, please let me know.
