Mark: The DPE remedial system should be up and running soon (probably today). It will run for a week, than will need to be shut down for a while due to sewer department discharge requirements. After the brief shutdown, the equipment will be re-started for full-scale operation.

I (and possibly Gowri) will be at your office tomorrow for a meeting on another property (at 2:00). If there is anything that you believe requires a 'face to face' discussion, let me know & I could meet you before or after this other appointment. I have attached a couple of figures that provide a 'sneak preview' of the well sampling results from late June 2014 (reports still not finalized).
