ACHCSA Fuel Leak Case No. RO0000377

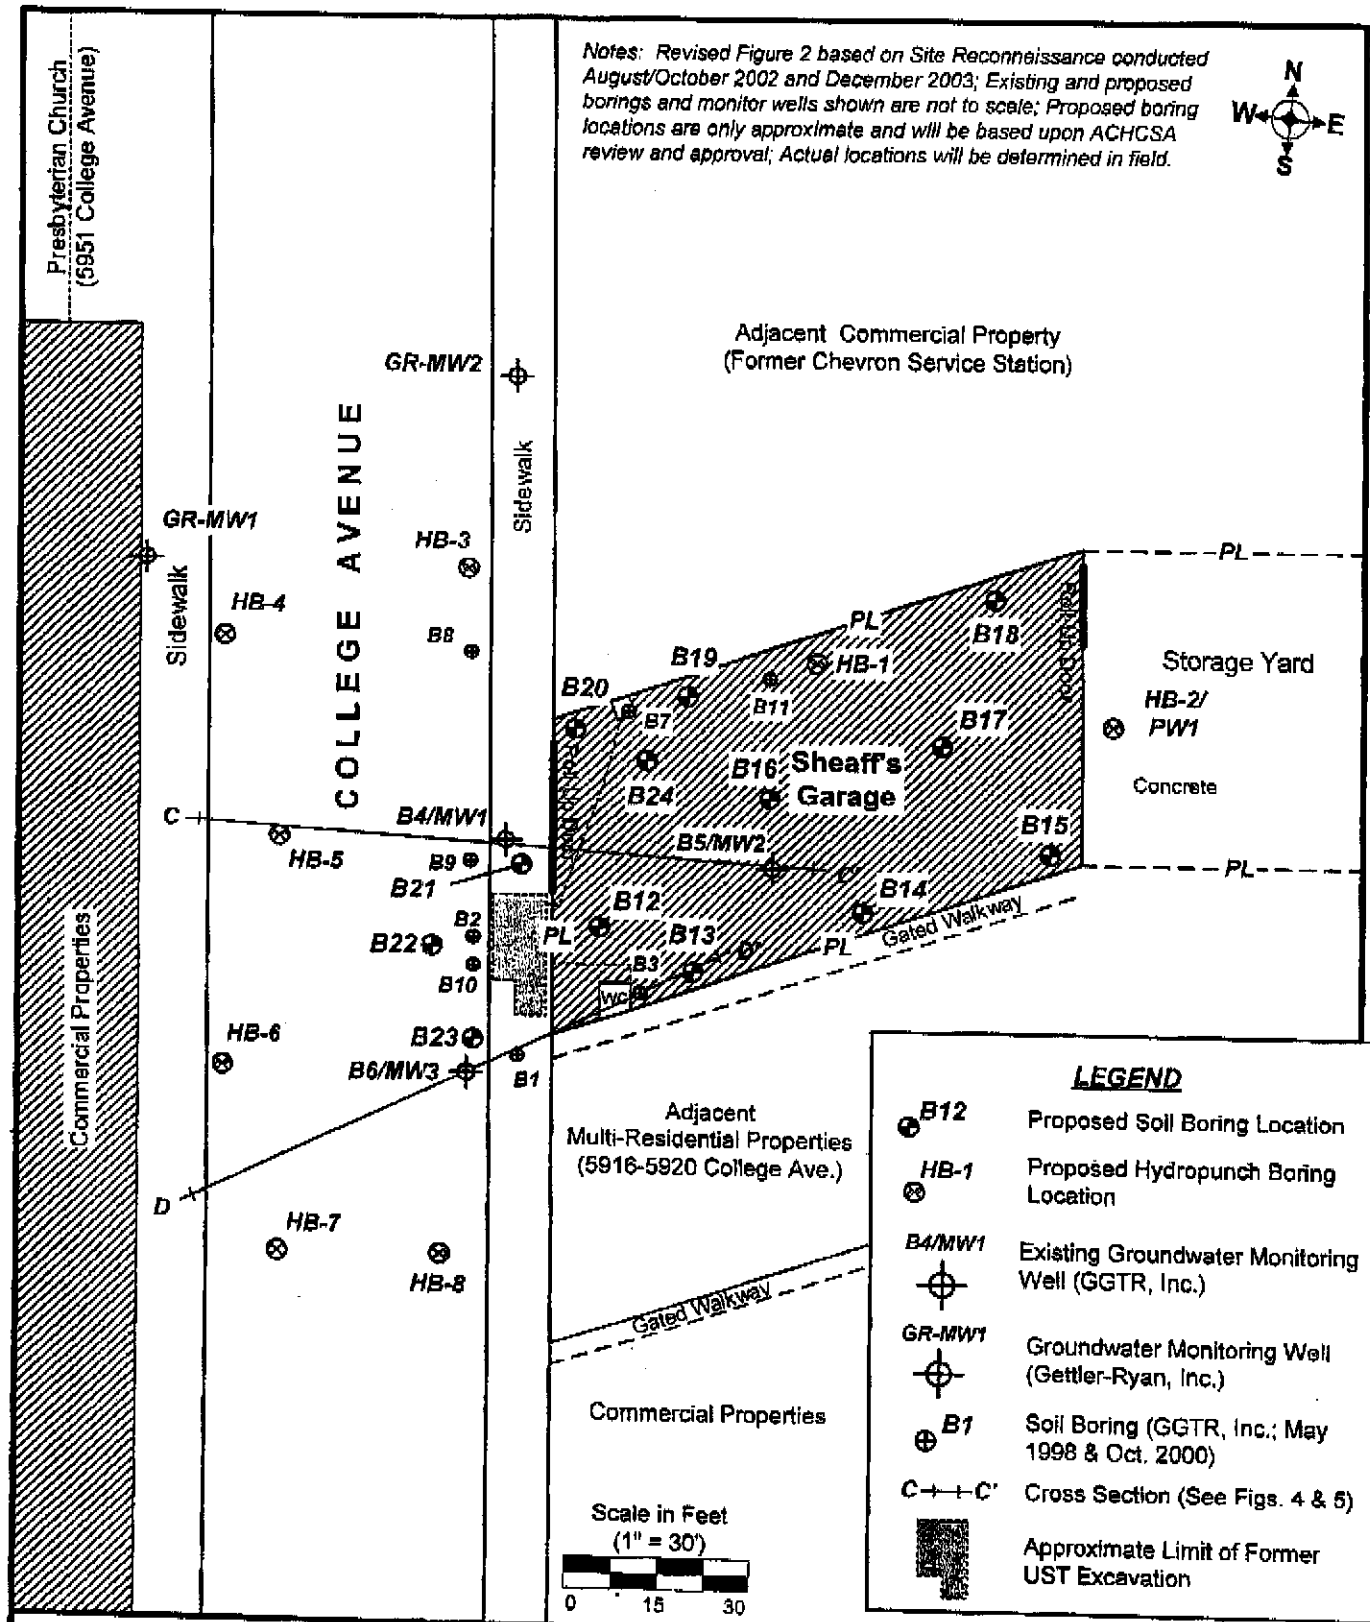

Dear Mr. Hwang:

GGTR is scheduled to commence drilling & sampling activities on Tuesday, April 5, 2005 (@8:00 AM) at 5930 College Avenue in Oakland, California. Activities will include installation of the piezometer well (HB-2/PW1) pursuant to our most recent March 7, 2005 submittal, Piezometer Well Installation & Sampling, as well as percussion drilling of various borings located on the interior of the site building. We are expediting installation of PW1 in order to coincide well sampling with joint monitoring activities scheduled with Gettier-Ryan (5940 College Avenue) on April 14, 2005. We are tentatively scheduled to complete implementation of the approved work plan activities on April 25-27, 2005. Attached is a site plan showing proposed drilling locations.

Please call with any questions. You can reach me on cellular at (916)-616-4126.

Sincerely,
 Brent A. Wheeler

Notes: Revised Figure 2 based on Site Reconnaissance conducted August/October 2002 and December 2003; Existing and proposed borings and monitor wells shown are not to scale; Proposed boring locations are only approximate and will be based upon ACHCSA review and approval; Actual locations will be determined in field.

LEGEND

- B12** Proposed Soil Boring Location
- HB-1** Proposed Hydro-punch Boring Location
- B4/MW1** Existing Groundwater Monitoring Well (GGTR, Inc.)
- GR-MW1** Groundwater Monitoring Well (Gettler-Ryan, Inc.)
- B1** Soil Boring (GGTR, Inc.; May 1998 & Oct. 2000)
- C---C'** Cross Section (See Figs. 4 & 5)
- Approximate Limit of Former UST Excavation
