Hi Jerry,

First of all I want to say thanks you for sending this information to us, and keeping me and Amanda updated info on this Fuel Leak Case No. RO0000382.

Its worry me that "Plume Migration to Southeast" petroleum hydrocarbons have increased in groundwater. My question is what Ninyo & Moore doing groundwater extraction and enhanced bioremediation system it seems pushing those petroleum hydrocarbons to our property, of course I don't know how exactly this system work. Because currently we having difficulty to get refinance on our property and it cost us more than it should because of this petroleum hydrocarbons have increased in groundwater on our property, the bank had told us that, and still not sure we can get the loan approve at this point.

Please continue to keep us informed of the progress, We really appreciate your time!

Sincerely,

Andy Chui/Amanda Chui
2309-2311 Santa Clara Ave,
Alameda CA 94501
