Jerry,
I have been directed by my client to follow your directives explicitly.
So, if you feel that this is the most cost effective approach, I will work with you, and you will not hear any alternative proposals from me, for now.
I am willing to have an open mind and see how things progress.
Kindest regards,
Frank

Frank,

There are reasons for each of the tasks requested in our directive letter. We want to make sure that future funds are spent wisely to collect good quality data and to implement a cost effective cleanup. Simply performing a one-time DPE event is not an acceptable proposal at this time.

Jerry,
The bottom line is that the RP has very limited resources to do more corrective action and has not been able to get reimbursement from the cleanup fund, even for routine monitoring. Mr. Chun has said that he would just have to go into his retirement fund to do the cleanup and hope to get reimbursed later. I would like to propose that we spend what little money there is available to do as much cleanup as possible before we do more investigation and re-conditioning of wells, etc. I would simply like to use Cal Clean to do dual phase extraction with air sparging as past RAPs have shown that this will be effective. Let me know if this is amenable to you.

Thanks,
Frank

P.S. Mr. Chun is going to try again to turn in some reimbursement requests to the Fund. Perhaps you could help in this regard?
