Purging would be required prior to sampling.

Hello Jerry,

As proposed in Ninyo & Moore's Work Plan dated February 23, 2012, the groundwater monitoring and extraction wells at Chun's Service Station have been replaced. We are ready to develop the newly installed wells, and redevelop existing wells. These wells will have 10 volumes of water purged during development this week. After 10 volumes of water have been purged from the wells and 24 hours has passed, are we required to purge another 3 volumes of water or may we sample without purging the wells?

I look forward to your response.

Thank you,

- Jake
