ERI 229312JA.L10

Mr. Joseph A. Aldridge  
Valero Energy Corporation  
685 West Third Street  
Hanford, California 93230

RD 390

Subject: Notification of Drilling Activities, Former Exxon Service Station 7-0238,  
2200 East 12<sup>th</sup> Street, Oakland, California.

Mr. Aldridge:

At the request of ExxonMobil Oil Corporation (ExxonMobil), Environmental Resolutions, Inc. (ERI) is notifying you of the upcoming field work related to the subject site. Work will include installing four on-site dual-phase extraction (DPE) wells (DPE1 through DPE4) as part of a soil and groundwater remediation system to be installed at the site in June 2003. Well locations are shown on the attached Generalized Site Plan. Drilling is scheduled for June 4 and 5, 2003. ERI anticipates the work will be completed in two days.

Soil and debris from drilling activities will be stockpiled on and covered with plastic sheeting, and stored at the site in a location that does not interfere with site operations. Following the collection of soil samples from the stockpile, and evaluation of the laboratory analysis results of those samples, ERI will coordinate with ExxonMobil for disposal of the stockpile.

Please call Ms. Paula Sime, ERI's senior staff geologist for this site, at (415) 382-4324 with any questions regarding the work.

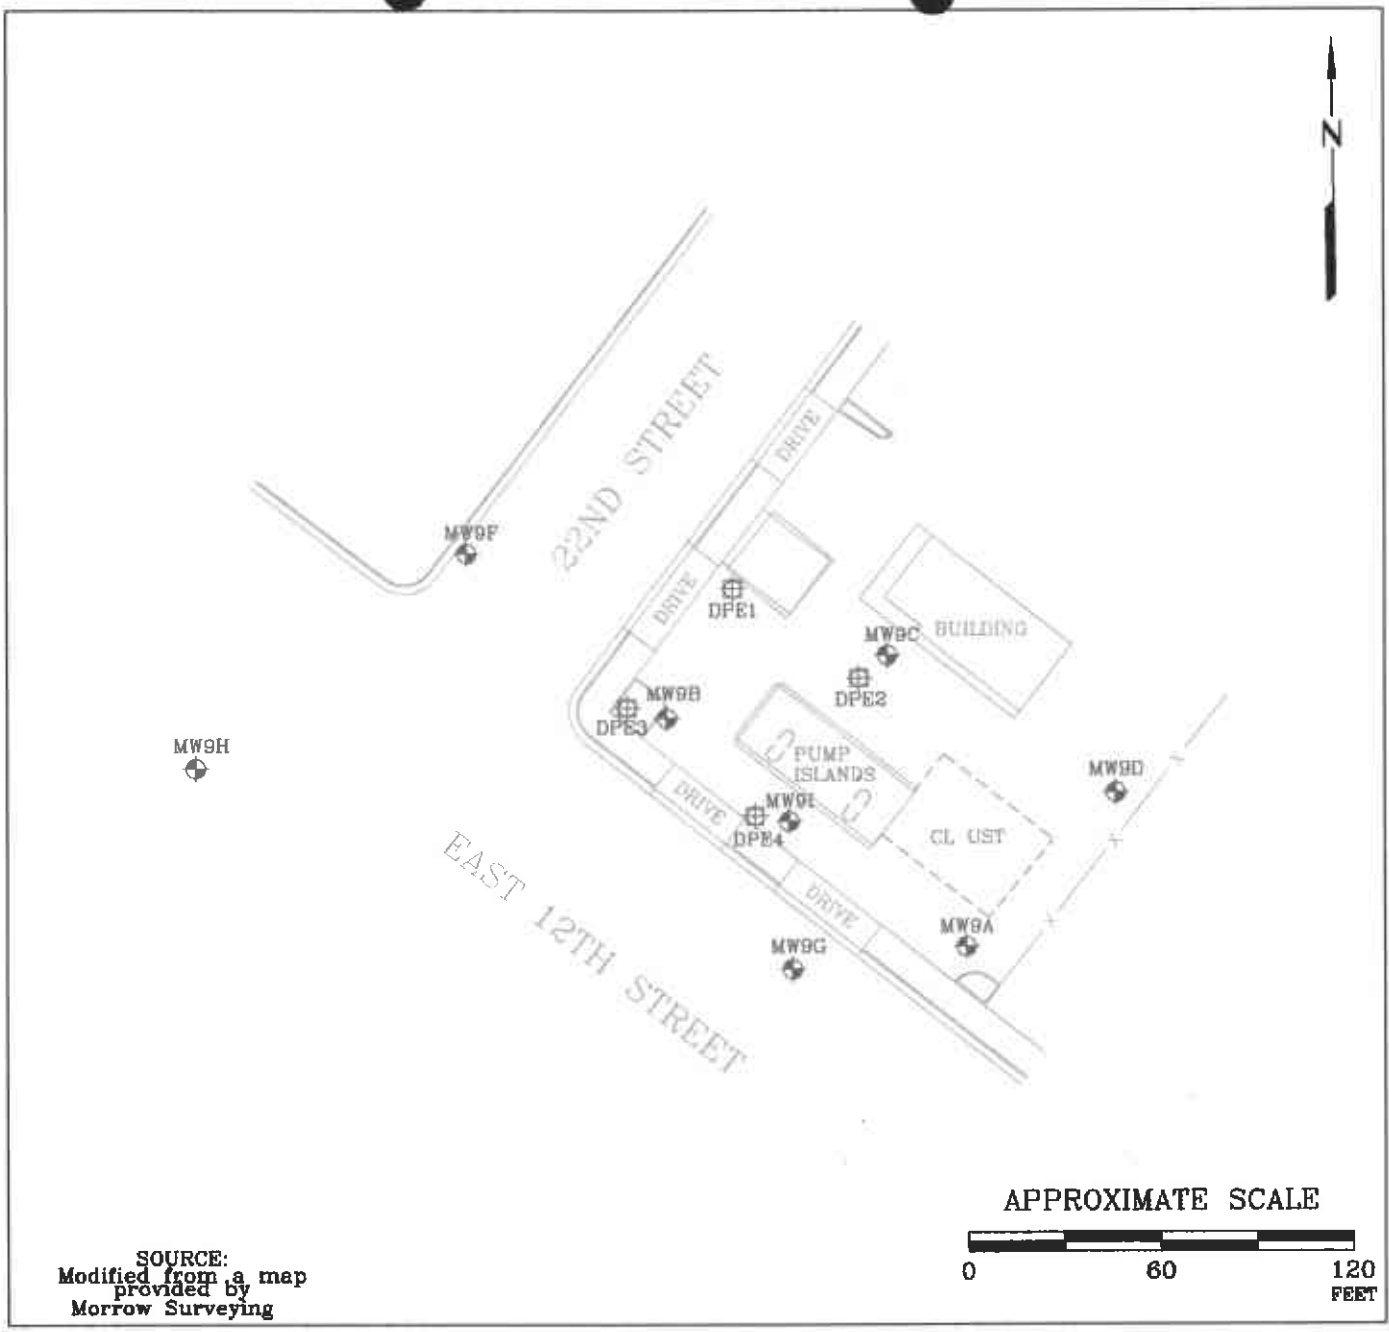

Sincerely,  
Environmental Resolutions, Inc.

Paula Sime  
Senior Staff Geologist

James F. Chappell  
Program Manager
